

Lateral Folding

The unique design of this hinged board means that it can be folded to allow the transfer of patients in a semi upright as well as supine position. This is beneficial for patients who suffer from breathing difficulties or patients who find it difficult to lie flat due to their underlying medical conditions. Made from high strength polypropylene.

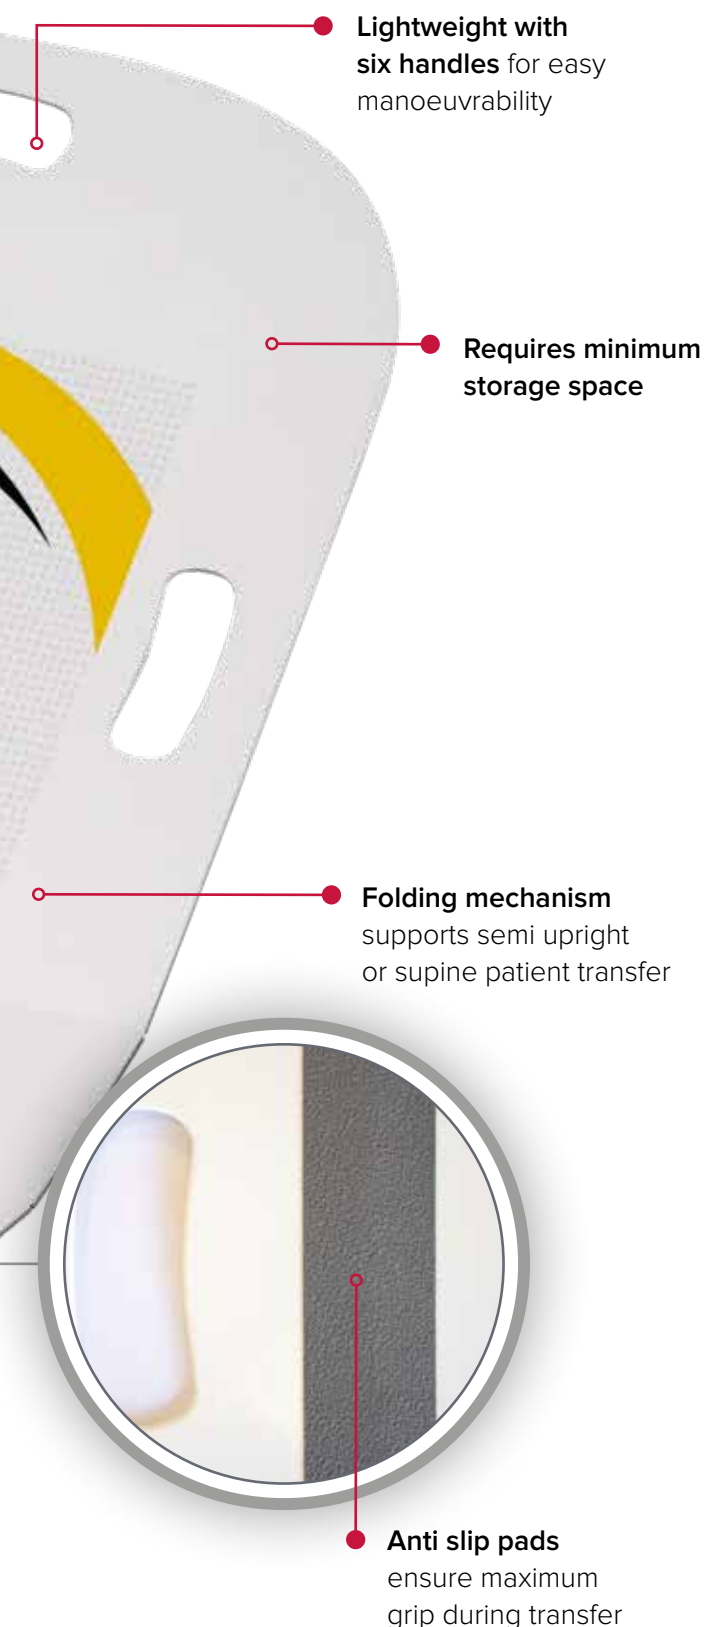

Two lengths and two widths of board are available to meet user needs and boards can be wiped clean using soap and water, cleaning disinfectants or alcohol based solutions (up to 75%).

High strength polypropylene
for maximum durability

Easy to wipe clean

Patient Transfer

Transfer Devices From GBUK Banana Offers

- ✓ A wide range of innovative products
- ✓ Compliance with safe manual handling procedures
- ✓ Increased safety for carer and the patient

Lightweight with six ergonomically positioned handles

This board can be easily positioned and removed in all transfer situations and requires minimal storage space. Two lengths and two widths of board are available, the narrower 59cm board is ideal for use in confined areas, whereas the wider board will effectively bridge a gap of up to 18cm.

Product Features

- ✓ Folding mechanism supports semi upright or supine patient transfer
- ✓ High strength polypropylene for maximum durability
- ✓ Lightweight with six handles for easy manoeuvrability
- ✓ Anti slip pads ensure maximum grip during transfer
