

# Medsled MS36 DECON

## Product description

The MS36DC is intended for use at Hazmat / Decontamination incidents where non-ambulatory persons have to be transported manually from the hazmat hot zone through decontamination and into the cleared zone. (Not used for vertical evacuation)

The MS36DC can be used to either slide or carry a non-ambulatory person through the hazmat process, it's ridged construction eliminates the need for a hard backboard and prevents pinch zones. The construction is 100% fully Decon capable, easy to lift onto Decon shower rollers, Decon water drains rapidly from the stretcher through the machined drain holes, carry handles and straps are sealed webbing for Decon cleaning and for easy storage the sled rolls up into storage / carry bag.
