

Prone

# Intoprone & Orbit

Unique easy to use proning devices used to accurately turn patients into a prone position. Staff maintain complete control during the entire turn and no longer have to “catch” the patient. Risk of staff injury is significantly reduced and patient safety is improved.

## Banana Orbit

**Section removed**  
to ensure no pooling  
under the patient and  
prevents compression  
on the chest

**Eliminates need  
to “catch” the  
patient** and  
reduces risk of  
staff injury

**One piece device**  
easy to insert and remove

**Complete control  
of patient during  
proning** improves  
patient safety
