

DURACABINET LTD

About Us

At DuraCabinet we build cabinetry using marine grade hi-density polyethylene (HDPE) sheets. This obviously makes it a great choice for any outdoor cabinetry, however there are plenty of indoor applications as well. They are very durable and easy to clean making them work well in garages, basements, mudrooms or even commercial/industrial applications. We have 12 standard texture colors to choose from, plus a wood grain texture option with 5 colors. All cabinets can be custom ordered to your specifications.

ORDERING

Item Codes

Item codes should be completed by adding the width of the cabinet you want to order to the item code. For example, if you want to order a standard base cabinet with a 3 drawer stack in 30" wide—your complete item code would be B6-30. You can order your cabinets to the inch (or fraction of an inch if necessary).

Drawer Slides

We have 3 drawer slide options. Our standard option is a full extension side mount slide. The other options are either an undermount soft-close (also full extension) or a full extension side mount in stainless steel.

Door Hinges

We have 2 door hinge options. Our standard is a soft-close euro hinge. The other option we offer is a stainless steel euro hinge. (The stainless steel hinge self closes but does not soft close)

Colors

We have a total of 17 color options available. There are 12 colors in the standard texture and 5 colors in the premium woodgrain texture.

Hardware

Our prices include a huge variety of drawer pulls, knobs and coat hooks.

We are a custom cabinet shop, so if you do not see a style or size cabinet that fits your needs, please let us know. We would be glad to build a cabinet that specifically fits you space or needs. Contact us with any questions, or for a free quote.

Very nice cabinets.

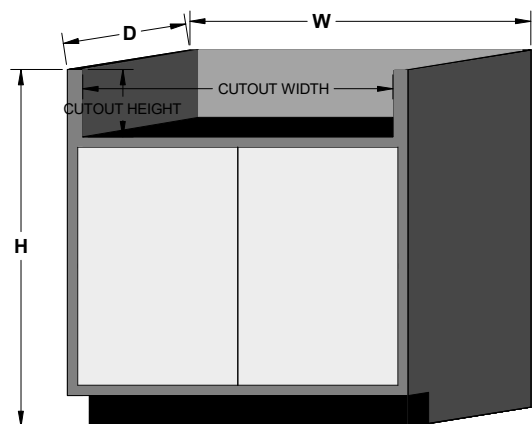

REVIEW FROM
KATHY PONTONES

Great service and great product. Leon and his guys went above and beyond expectations and delivered a great product. I would highly recommend.

REVIEW FROM COLLIN LABADY
