

IMPORTANT REQUEST FROM YOUR WATER SUPPLIER

CITY OF ANTHONY

Dear Water Customer,

The U.S. Environmental Protection Agency in conjunction with the Kansas Department of Health and Environment, is requiring all Public Water Supply systems to conduct a Lead Service Line Inventory (LSLI) of both the public and privately owned water service lines within our jurisdiction.

We would like to stress to you that the City of Anthony currently, and in the past, has had no lead issues within our water supply system. We are sending out this survey in an effort to obtain information about the privately owned (customer side) service lines within the system with a goal to identify and remove all lead pipes in the drinking water system for safety.

Please fill out this survey to the best of your knowledge. This information is crucial for us to complete our required system's material evaluation. KDHE will require your water supplier to obtain this information. **If we do not receive your survey, we will have to schedule a time to meet with you to obtain the information which may require a site visit.** If you have questions, please contact the City of Anthony at (620)842-5434.

While these contaminants are not in the source water, they can enter tap water through the corrosion of service line piping and older household plumbing materials and can be dangerous to health. We thank you for your cooperation in helping us with this to continue to serve clean and safe drinking water to our customers.

Additional information on the Lead and Copper Rule and identifying lead pipes and plumbing can be found on the KDHE website at: [KDHE Rule](#) or at the EPA Website at [EPA Rule](#) . Video: [Get the Lead Out](#) All links accessible at www.anthonyskansas.org.

Thank you for participating in this survey. PLEASE RETURN YOUR COMPLETED SURVEY TO:

City of Anthony by July 31, 2023

124 South Bluff, P.O. Box 504, Anthony KS 67003

Fill out survey and return or complete online at:
