

## DIY Systems

- All drawings are to be scaled drawings 1:100 (1cm = 2m) or 1:200 (1cm = 2m) and not mud maps with measurements on them.
- All drawings should show the location of:
  1. The water metre (WM) or bore (B)
  2. Preferred location of the controller (C) that will require a 240 volt outlet
  3. Conduits beneath hard surfaces such as concrete driveways
- All drawings should include:
  1. Clients name including surname for filing purposes
  2. Address of site
  3. Clients contact details including phone number and email address
  4. Flow rate in litres per second or time taken in seconds to fill a 9 litre bucket.

Please note the location of the tap (T) on the drawing.
