THE PROBLEM

Your business details live in dozens of places

Every platform keeps its own copy of your hours, address and phone number. Change one and the rest drift out of sync, and the wrong information is the version a customer sees.

Google

Open · 9–6

Apple Maps

Hours unavailable

Facebook

Open · till 8pm

Three platforms. Three different answers.

WHY IT MATTERS

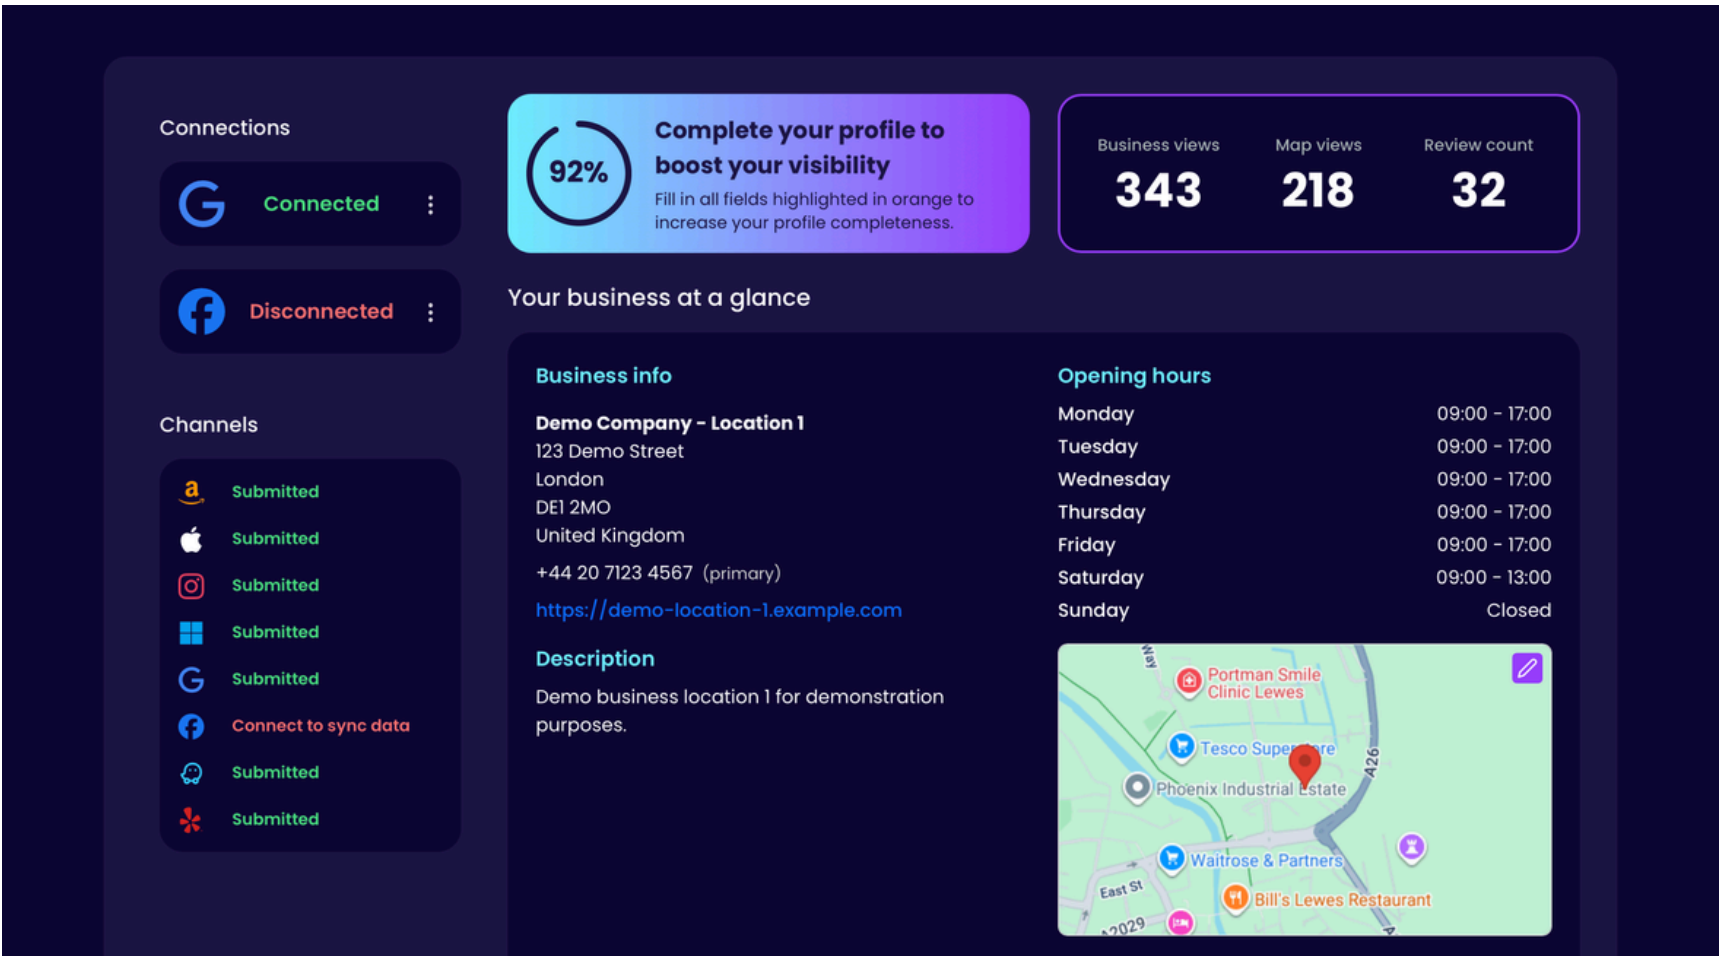

70%

of local searches lead to a store visit, usually within a day. Accurate listings decide whether that visit is yours.

MEET SMART LISTINGS

One place to manage your presence online

Update opening hours, contact details, services and promotions in a single step. No logging into multiple sites, no copying changes by hand, everything stays consistent where customers are looking.

HOW IT WORKS

Live in three steps

1

Connect

Link your Google Business Profile to pull in your existing business information.

2

Review & optimise

Check your details and improve every listing with AI so it is accurate and search-ready.

3

Sync & get found

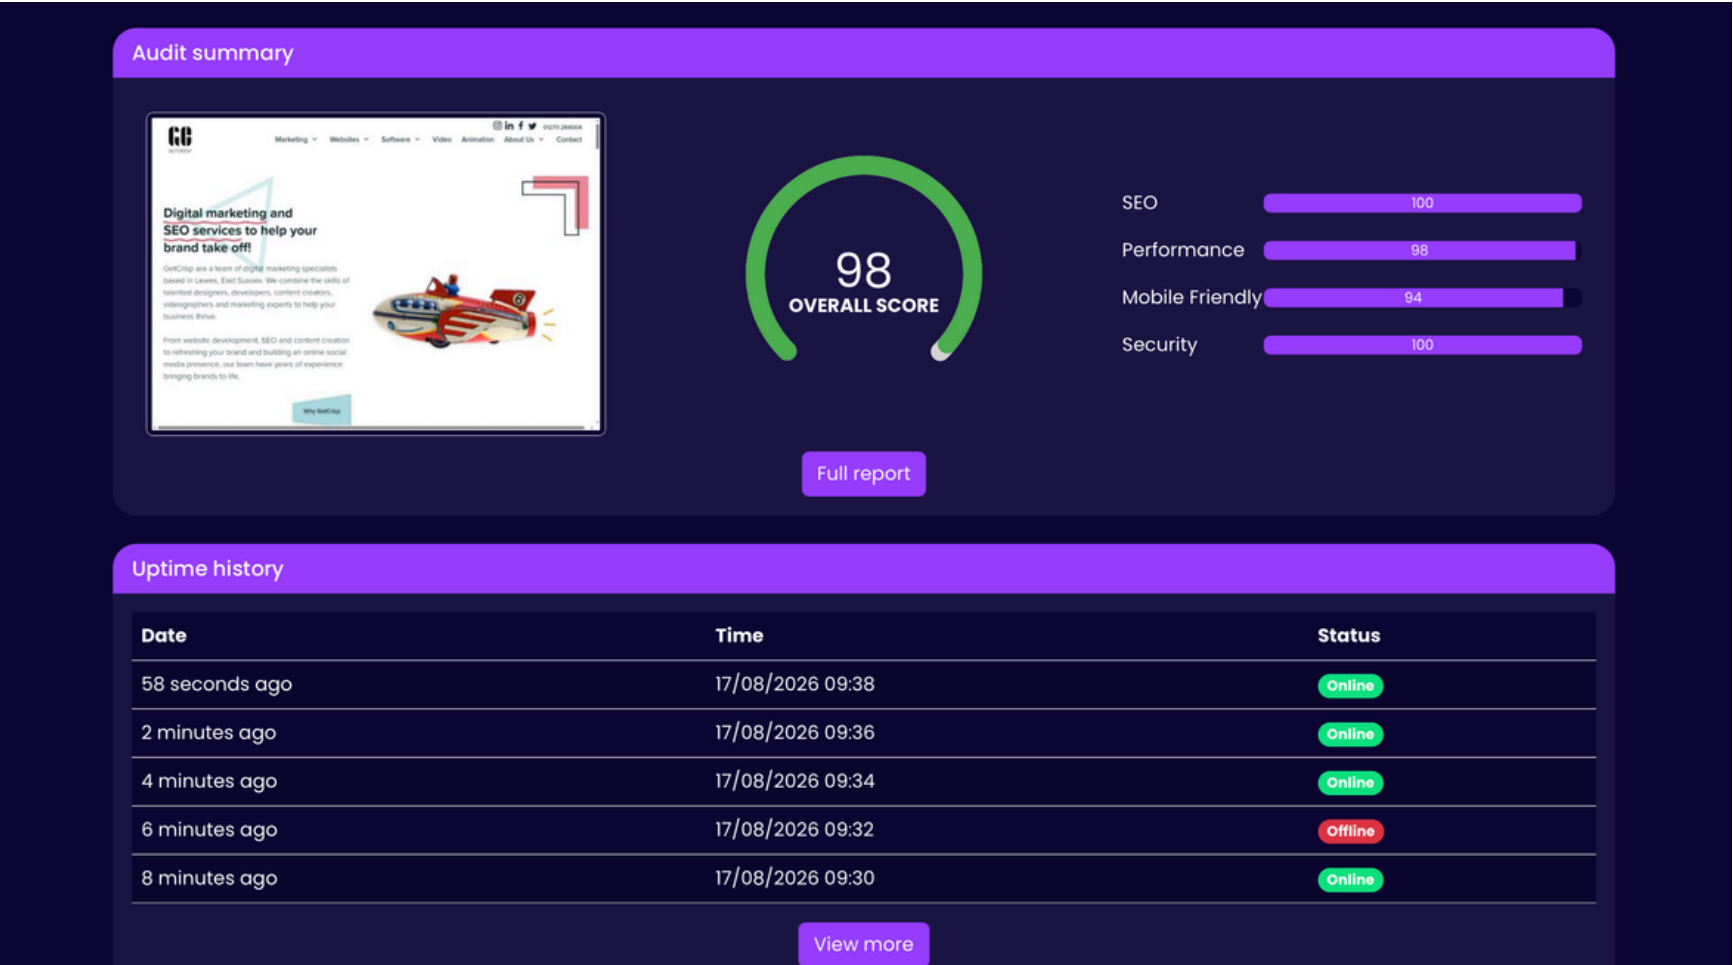

Publish across search, maps and listings so customers find exactly what you promise.

INSIGHTS

See how customers find you

Track discovery across search and maps in one view. From views and clicks to calls and direction requests, so you always know what is driving real-world visits.

AUDIT & OPTIMISE

Know your score at a glance

See an instant audit of your online presence, SEO, performance, mobile and security with AI suggestions and uptime monitoring, so you always know where you stand and what to improve next.

MULTI-SITE

Every location, one interface

Manage multiple locations from a single place, from business descriptions to opening hours. Update the whole estate at once and keep every branch consistent.
