

## ATC DOSAGE SYSTEMS

**ATC Self-Operated Filling Unit, API Plan 54**

Shell & Tube, Shell & Coil, **customized by ATC** for different services, chemicals in cooling fluid and atmosphere at site, capacities, alloyed materials, applicable local legislation PED, DOSH, API, ISO, GOST, ASME U-Stamp, SELO..

**API Plan 21/23**

Quality of materials and their weld, assembly and tests procedures, according to international applicable norm and standard, ensure to the **ATC customized heat exchangers**, suit the mechanical seal, in the specific requirements of each service

**PED**  
**2014/68/UE**

Main components required for customizing a **API Plan 682** systems are manufactured in ATC facilities, to get total interchangeability and original spares source.

**API Plan 21/23**

Customized Water and Air Coolers are **designed, manufactured and tested in ATC** meeting specific needs from each **End-User, the OEM**, local **applicable legislation** and project requirements from **the EPC or Engineering Company**.
