Liners and Vaults: What are they and how they work

A grave liner is a reinforced concrete box with drainage holes in bottom and no seals of any kind. Its purpose is to support the earth around the casket.
A vault is also a reinforced concrete box, but has additional polystyrene liners or metal liners inside the box and has butyl seals between the lid and box.
Whether a grave liner or vault is needed will depend on the cemetery by-laws.

Social Assistance

The Niagara region offers coverage for funeral services on behalf of residents whose estates cannot otherwise cover the cost. Should this be the case we can help guide the family in the right direction.
