

COTTON

### AT PLANTING

If using a starter, add 1–2 qts of **Earthquake Liquid Humic** and 1–2 qts of **Sweet ‘n’ Loam**.

### VEGETATIVE GROWTH STAGE

Apply 1 qt **Earthquake Liquid Humic** and 2–4 qts **Triple 8 Plus**, and 1 qt of **Sweet ‘n’ Loam** per acre. If a starter was not used, apply 2 qts **Earthquake**. Add 4 oz **NanoPro** per acre with herbicide/crop protection (via inductor system).

### REPRODUCTIVE GROWTH STAGE

Apply 1–2 qts **DropKick** per acre at first bloom. Adding 1–2 qts **DropKick** per acre to follow-up applications, including with pix, will continue to promote blooms and boll development. If using a fungicide, add 4 oz **NanoPro** per acre (via inductor system).

## EARTHQUAKE Triple 8 Plus DropKick

### ADDITIONAL PRODUCTS

- **Starting Gate** can be used as a starter at 2–4 gal/ac (in-furrow) and 4–5 gal/ac 2x2.
- Apply 1–2 qts **Sweet ‘n’ Loam** per acre with any foliar application.
- **PaybackK** or **Keynote B+** can also be applied during the reproductive growth stage.

### GENERAL COMMENTS

- Our products can be applied with most herbicides, pesticides, and fungicides. A jar test is recommended to establish compatibility.
- If applying with an herbicide, utilize WILDFIRE as your water conditioner.
- Utilize NanoPro with fungicide, herbicide or other crop protection products, add 4 oz of NanoPro per acre. Best results occur when NanoPro is introduced directly to herbicide (via an inductor system). If no inductor system, call for mixing order.
- For best results, apply a minimum of 1 gal Earthquake per acre per season, in split applications.

### OTHER PRODUCTS TO CONSIDER

**Keynote B+** (2-0-16) with 2.5 boron and 0.2 moly. Apply 1–2 qts/ac.

**PaybackK** Apply 2–4 qts/ac as a late-season foliar nutrient (2-16-16 with 6 micros) with Earthquake Liquid Humic.

**LIQUID KELP** To help mitigate crop stress, add 1 qt/ac to any application.

**Micro-N-Rich Micro-N-Tense** Micronutrient packages that can be added to any application.

**Sweet ‘n’ Loam** 35% cane molasses sugar (4-0-3-1S). Apply 1–4 qts/ac as an energy source for plants and soil microbes.

*Sugar Creek Ag suggests growers conduct soil tests and amend the soil accordingly. The above recommendations are to best supplement your fertility program. A tissue analysis is best to identify crop nutrition needs. Growing conditions, crop needs and farming practices vary, feel free to contact us to discuss the best ways to utilize our products on your farm.*
