

HEMP

AT PLANTING

Apply 2 qts **Earthquake Liquid Humic**, 2–4 qts **Triple 8 Plus**, and 1 qt **Sweet 'n' Loam** per acre.

If dipping transplants, use a solution of 1 oz of each product listed per gallon of water.

VEGETATIVE GROWTH STAGE

Apply 1 qt **Earthquake Liquid Humic**, 2–4 qts **Triple 8 Plus**, 1 qt **Sweet 'n' Loam**, 1 qt **Liquid Kelp**, and 1 qt **Fulvic FM** per acre.

Apply weekly for 5 weeks.

Can be applied via drip irrigation.

REPRODUCTIVE GROWTH STAGE

Apply 2–4 qts **PaybackK**, 1 qt **Sweet 'n' Loam**, 1 qt **Liquid Kelp**, and 1 qt **Fulvic FM** per acre.

Apply weekly or bi-weekly for 3 weeks (or 2 weeks prior to harvest).

Can be applied via drip irrigation.

EARTHQUAKE Triple 8 Plus PaybackK

OTHER HEMP RECOMMENDATIONS

- One week before harvest, begin cutting back on watering to “stress” the plant, which has been shown to increase CBD levels.

GENERAL COMMENTS

- Our products can be applied with most herbicides, pesticides, and fungicides. A jar test is recommended to establish compatibility.
- If applying with an herbicide, utilize WILDFIRE as your water conditioner.
- Utilize NanoPro with fungicide, herbicide or other crop protection products, add 4 oz of NanoPro per acre. Best results occur when NanoPro is introduced directly to herbicide (via an inductor system). If no inductor system, call for mixing order.
- For best results, apply a minimum of 1 gal Earthquake per acre per season, in split applications.

OTHER PRODUCTS TO CONSIDER

Cal-zone

100% soluble calcium, immediately plant available. Utilize at 3–5 gal/ac based on needs.

BrimStone 17

Add 1 qt/ac to any application for additional sulfur.

Sweet 'n' Loam

35% cane molasses sugar (4-0-3-1S). Apply 1–4 qts/ac as an energy source for plants and soil microbes.

Shug Nitro

25% cane molasses sugar (12-0-2-1S). Apply 1–4 qts/ac.

Micro-N-Rich Micro-N-Tense

Micronutrient packages that can be added to any application.

Sugar Creek Ag suggests growers conduct soil tests and amend the soil accordingly. The above recommendations are to best supplement your fertility program. A tissue analysis is best to identify crop nutrition needs. Growing conditions, crop needs and farming practices vary, feel free to contact us to discuss the best ways to utilize our products on your farm.
