

SUGAR CREEK Ag

STRAWBERRIES

PRE-PLANT

Apply 2–4 gal **Cal-zone** and 2–4 qts **Earthquake Liquid Humic** per acre.

AT PLANTING (OR IN TRANSPLANT WATER)

Apply **Starting Gate** (2–4 gal/ac) with 2 qts **Earthquake Liquid Humic**, 1–2 qts **Micro-N-Rich**, and 1 qt **Liquid Kelp** per acre.

If dipping or drenching plants, use a solution of 1 oz of each product listed per gal of water.

VEGETATIVE GROWTH STAGE

Apply 1 qt **Earthquake Liquid Humic**, 2 qts **Triple 8 Plus**, and 1 qt **Sweet 'n' Loam** as needed.

Can be applied through drip irrigation.

REPRODUCTIVE GROWTH STAGE

Apply 1 qt **Earthquake**, 2 qts **PaybackK**, and 1 qt **Sweet 'n' Loam** as needed through harvest.

Can be applied through drip irrigation.

EARTHQUAKE Triple 8 Plus PaybackK

ADDITIONAL PRODUCTS

- **Phos Factor Z** can also be used as a starter (2–4 gal/ac).
- **Cal-zone** should be applied every 3rd feeding through drip lines at 1–2 qts/ac.
- **NanoPro** is recommended with any application that includes an herbicide, systemic insecticide, or fungicide.

GENERAL COMMENTS

- Our products can be applied with most herbicides, pesticides, and fungicides. A jar test is recommended to establish compatibility.
- If applying with an herbicide, utilize WILDFIRE as your water conditioner.
- Utilize NanoPro with fungicide, herbicide or other crop protection products, add 4 oz of NanoPro per acre. Best results occur when NanoPro is introduced directly to herbicide (via an inductor system). If no inductor system, call for mixing order.
- For best results, apply a minimum of 1 gal Earthquake per acre per season, in split applications.

OTHER PRODUCTS TO CONSIDER

Cal-zone

100% soluble calcium, immediately plant available. Utilize at 3–5 gal/ac based on needs.

BrimStone 17

Add 1 qt/ac to any application for additional sulfur.

LIQUID KELP

Add 1 qt/ac to starter or foliar applications to reduce crop stress.

Fulvic FM

Add 1 qt/ac to foliar applications to aid nutrient delivery and uptake.

Micro-N-Rich Micro-N-Tense

Micronutrient packages that can be added to any application.

Sugar Creek Ag suggests growers conduct soil tests and amend the soil accordingly. The above recommendations are to best supplement your fertility program. A tissue analysis is best to identify crop nutrition needs. Growing conditions, crop needs and farming practices vary, feel free to contact us to discuss the best ways to utilize our products on your farm.
