

GRASS HAY & PASTURE

AT GREEN-UP

Apply 2 qts **Earthquake Liquid Humic** and 4 qts **Forage Factor** per acre.

AFTER EACH CUTTING

Apply 1 qt **Earthquake Liquid Humic** and 4 qts **Forage Factor** per acre.

AFTER LAST CUTTING

Apply 1 qt **Earthquake Liquid Humic** and 2 qts **DropKick** or **Payback** per acre.

EARTHQUAKE **NanoPro** Forage Factor

ADDITIONAL PRODUCTS

- Follow-up applications should be made with 2–4 inches of regrowth or every 30–45 days if grazing.
- After the first cutting, **DropKick** can be added for additional potash and boron. Apply **DropKick** with Forage Factor (total 4 qts minimum) or by itself (2–4 qts/ac) with 1 qt **Earthquake**.
- Grenade** can be added at 1 gal/ac where additional nitrogen is needed, especially for warm season grasses such as Bermuda.

GENERAL COMMENTS

- Our products can be applied with most herbicides, pesticides, and fungicides. A jar test is recommended to establish compatibility.
- If applying with an herbicide, utilize WILDFIRE as your water conditioner.
- Utilize NanoPro with fungicide, herbicide or other crop protection products, add 4 oz of NanoPro per acre. Best results occur when NanoPro is introduced directly to herbicide (via an inductor system). If no inductor system, call for mixing order.
- For best results, apply a minimum of 1 gal Earthquake per acre per season, in split applications.

OTHER PRODUCTS TO CONSIDER

Cal-zone

100% soluble calcium, immediately plant available. Utilize at 3–5 gal/ac based on needs.

BrimStone 17

Add 1 qt/ac to any application for additional sulfur.

Fulvic FM

Add 1 qt/ac to foliar applications to improve nutrient delivery and uptake.

GRENADE

Add 1 gal/ac (20-0-0-5S) for additional nitrogen, especially in low-organic or sandy soils.

PaybackK

Apply 2–4 qts/ac as a late-season foliar nutrient (2-16-16 with 6 micros) with Earthquake Liquid Humic.

Sweet 'n' Loam

28% cane molasses sugar (4-0-3-2S). Apply 1–4 qts/ac as an energy source for plants and soil microbes.

Shug Nitro

25% cane molasses sugar (12-0-2-1S). Preferred for crops needing higher nitrogen content such as grasses and corn. Apply 1–4 qts/ac.

Sugar Creek Ag suggests growers conduct soil tests and amend the soil accordingly. The above recommendations are to best supplement your fertility program. A tissue analysis is best to identify crop nutrition needs. Growing conditions, crop needs and farming practices vary, feel free to contact us to discuss the best ways to utilize our products on your farm.
