

CWT TRAINING ACADEMY

# Course Catalog

## Training pathways for water-first professionals.

Certifications, permit refreshers, recertifications, team learning options, and practical training for stormwater, construction, environmental compliance, water quality, and workforce development.

### Permits & Compliance

Training aligned to stormwater permit responsibilities, inspections, documentation, and reporting.

### Credentials & Badges

Certifications, recertifications, digital certificates, and badges where issued by CWT.

### Team Training

Group quotes, learner access, records, tracking, and training support for organizations.

HOW TO USE THIS CATALOG

# Start with the requirement. Then build the path.

Most CWT learners are looking for training because they have a jobsite, permit, certification, team-training, or compliance requirement. This printable catalog helps learners, employers, municipalities, and organizations compare courses and see how training connects to permit responsibilities and career growth.

## Find required training first

Use the state, category, credential, and permit relevance information to quickly locate the best fit.

## Confirm course details

Prices, PDHs, CEUs, and credential outcomes are subject to change. Confirm final details before purchase.

## Plan for teams

For group registration, email [info@cwtacademy.com](mailto:info@cwtacademy.com) with course code, learner count, organization, and timeline.

## Plan the next step

Career Builder items are listed as coming soon while CWT rebuilds that product line.

## Training a team?

CWT offers group registration discounts, team access pages, training portals with tracking, compliance ERS dashboards, and hosted group training options. See the Team Training Options section near the back of this catalog for the full program details.

**GROUP QUOTES AVAILABLE**

Washington | State Certification | Construction

## Washington CESCL Certification

### BRIEF DESCRIPTION AND PERMIT RELEVANCE

State-specific construction stormwater certification training for learners who need Washington CESCL knowledge for jobsite compliance. Permit relevance: Meets Washington Ecology Construction Stormwater General Permit BMP C160 training and certification expectations for personnel responsible for monitoring stormwater at regulated construction sites.

PRICE	<b>\$400.00</b>
PDHS	<b>16 PDH</b>
COURSE LENGTH	<b>16 hours</b>
COMPLETION WINDOW	<b>5 consecutive calendar days</b>
CREDENTIAL	<b>CESCL-WA Credential</b>
VALID FOR	<b>3 years</b>

Digital certificate/badge: Includes verifiable digital certificate and badge  
Best for: Inspectors, contractors, construction stormwater staff

COURSE CATALOG

# Team Training Options

Group registration discounts, team access pages, training portals, reporting dashboards, and hosted training options for organizations that need to train more than one person.

## TEAM TRAINING OPTIONS

# One program. Four clear ways to train your team.

CWT team training is designed for organizations that need to register multiple learners, simplify access, document completion, or support compliance recordkeeping. Start with the simplest option that fits your need, then upgrade only when you need tracking, reporting, dashboards, or hosted non-certification training.

## 1 Group Registration Discounts

Best for multiple employees taking the same course or certification individually.

Discounted seats or vouchers, individual learner accounts, individual certificates or badges where issued by CWT.

## 2 Team Access Page

Best for teams that want one branded place to send learners.

A simple branded page with selected course buttons, access instructions, and a cleaner registration experience.

## 3 Team Portal with Tracking / ERS

Best for managers who need records, certificates, expirations, and reports.

Completion tracking, certificate access, expiration dates, seat usage tracking, reports, alerts, and dashboard options.

## 4 Hosted Group Training Access

Best for eligible non-certification training delivered to a group in a shared session.

Host-led access for training days, safety meetings, or staff refreshers when individual certification tracking is not required.

## GROUP REGISTRATION DISCOUNTS

# Buy seats for the same course and save.

Use this option when 5 or more learners need the same course or certification. Each learner completes the course in their own account. CWT can issue access instructions or voucher codes so employees do not need to pay out of pocket.

Learners for same course	Discount	Example: \$400 course	Example: \$200 course
5-20	5% off	\$380 per learner	\$190 per learner
21-30	8% off	\$368 per learner	\$184 per learner
31-40	10% off	\$360 per learner	\$180 per learner
41-50	12% off	\$352 per learner	\$176 per learner
51-75	15% off	\$340 per learner	\$170 per learner
76-100	20% off	\$320 per learner	\$160 per learner

## Important group registration rules

- Minimum: Group discounts begin at 5 learners for the same course.
- Per-course rule: Discount thresholds are calculated per course. Seats for unrelated courses are not combined to reach a quantity threshold.
- Voucher window: Discounted vouchers are valid for 12 months from issue unless otherwise stated.
- Certification rule: Certification courses must be completed by individual learners in their own accounts.

# Add structure when the team needs more than seats.

Group registration solves the purchase problem. Portals and ERS solve the management problem. Hosted Group Training Access solves the shared-room training problem for eligible non-certification courses.

## Team Access Page

Best for 15+ learners or teams that need one clean access point.

Branded page, selected course buttons, learner instructions, and a simple registration gateway. CWT may provide this with qualifying seat packages.

## Team Portal with Tracking

Best for departments that need proof of completion.

Roster view, completion tracking, certificate access, completion dates, and certification expiration visibility for CWT-issued credentials.

## Compliance ERS Dashboard

Best for municipalities, agencies, and larger compliance teams.

Private secure access, custom dashboard, downloadable reports, seat tracking, low-seat alerts, expiration alerts, resource options, and expanded recordkeeping support.

## Hosted Group Training Access

For eligible non-certification training that will be shown by a host in a shared group setting. This option does not replace individual certification requirements and does not provide individual completion tracking unless additional support is arranged.

HOW TO REQUEST A TEAM QUOTE

# Tell us what you need. We will match the right option.

Use the Request Group Quote button in the digital course catalog or email CWT directly. The questions below help CWT route the request to the correct offer without making the buyer decode program names.

## Include these details in your request

- Course name and course code
- Estimated number of learners
- Do learners need individual certificates or credentials? Yes / No
- Do you need completion tracking or certificate access? Yes / No
- Do you need a branded access page? Yes / No
- Do you need expiration alerts, reports, or compliance documentation? Yes / No
- Will the training be completed individually or hosted in a shared group setting?
- Billing, purchase order, or deadline notes

## How CWT routes team requests

<b>Simple bulk purchase</b>	-> Group Registration Discounts
<b>Needs one access page</b>	-> Team Access Page
<b>Needs completion records</b>	-> Team Portal with Tracking
<b>Compliance reports or expirations</b>	-> Compliance ERS Dashboard
<b>Hosted non-certification training</b>	-> Hosted Group Training Access
