

ACCESSIBLE PARKING INFORMATIONAL MEETING

The Finance Council would like to invite all members of the Parish to attend an informational meeting regarding accessible parking. Accessible parking was one of the projects that was selected by the Parish as part of the Love One Another Campaign. After numerous conversations, involvement from the Wisconsin Department of Transportation, and engagement of an engineering firm we have a plan that we are ready to share with the Parish. A representative from Harwood Engineering, the firm engaged to design the plan, will be here to present the plan. On the reverse side of this page is a print of the parking lot plan.

The parking lot plan includes the addition of approximately 14 new parking spaces along the west side of the church property facing Hwy 175, a new driveway entrance, sidewalks connecting the parking area to the church buildings, and improved accessibility for parishioners.

Based on the site plan we received a budgetary cost of approximately \$175,000. Funding for the project is available from the following sources: Love One Another Campaign, Improvement Fund, and Endowment Fund earnings. The parish has the funds available to move this project forward. Once we have received approval from the Wisconsin Department of Transportation, we will begin the process of obtaining formal estimates to complete the project. We hope to complete the project before the close of 2026.

The meeting will provide an opportunity to:

1. Review the site plan.
2. Learn about the project's purpose and benefits.
3. Ask questions and address concerns regarding the site plan.

Being informed is important as we prayerfully consider this project and its impact on our Parish and the future.

Meeting Date: Tuesday, July 14, 2026

Time: 4:00 pm

Location: Church Hall

We encourage all members to attend and learn of this important discussion as we seek God's wisdom for the future of our church. We look forward to seeing you there.

Thank you.
