

MANISTEE COUNTY TRANSPORTATION, INC.
RFP QUESTIONS AND ANSWERS
IN-GROUND HOISTS

Q:

I may ask if we can make a site visit. Also Did you want me to include a sump pump for each lift to keep the water pumped out of the pits? Also do you want me to include a remote for each lift? This helps position the lift under the vehicle. Thank you!

Q:

I saw in the bid you are requesting a 10 year warranty. Is this just for the workmanship warranty? Or are you expecting that warranty on the lifting components as well?

Q:

Sorry to keep sending all these messages. Could I come up Wednesday the 28th at 10am with a contractor to look at the site with him so we make sure we have everything covered?

Answers:

Remotes and sump are unnecessary at this time. If you wish you can make a option side quote for these items. The ten year warranty is what we would want but you can specify what your warranty is and how long. I will be here on the 28 th if you want to stop by. I request any questions to be in a written form as to give same info to all bidders.

Question:

Do the bids have to be mailed or can they be emailed.

Answer:

The RFP state 4 hard copies but you can email also if you would like.

Question:

1. Will Manistee consider a deadline extension – due to the scope of work and organizing trades for estimates, a longer deadline is requested to confirm scope/pricing.
2. Will an alternate at \$50000 lbs be sufficient? Based on the previous site discussions and vehicles this should suffice.

Answers:

1. Yes, Manistee will consider a deadline extension due to the short time span originally entered into RFP. Please accept the new date of February 18th, 2026.
2. You may bid a 50,000 lb. hoist in a separate proposal if you like and we will look at that as an option also.
