

RETHINK THE WAY YOU TREAT THE ANKLE

Immobilize

Stabilize

Protect & Prevent

DYNAMIC ANKLE SUPPORT SOCK

The innovative design helps restrict and reduce ankle movement and shifting, encouraging dorsi and plantar flexion but not eversion and inversion.

STABILITY STRAPS
mimic ankle taping to prevent and protect injury

FLEXIBLE CAGE
mirrors ankle ligaments, enhancing healthy movement and restricting extreme movement

ENGINEERED KNIT
provides compression and arch support while mimicking ankle wrapping

PREVENTATIVE

Chronic Ankle Instability
Balance Assist
Weak Ankles
Sports / Exercise
Proprioception Support
Taping Supplement

TREATMENT

Inversion/Eversion Sprains
PTTD
Post-op
Arthritis

DYNAMIC ANKLE SUPPORT SOCK

DASS fits more naturally and comfortably in a shoe compared to standard braces that are too bulky or negatively adjust the fit and performance of the shoe.

SUPPORTS LIKE A
BRACE
WEARS LIKE A
SOCK™

Give your patients confidence to return safely back to activity with DASS

DASS is sleek enough to fit into a standard shoe without affecting fit or feel, giving the patient a sense of natural gait and movement.

Shoe can be laced up as normal, helping let the shoe's performance and inherent support and stability still function properly and as intended.

The cage's slight tacky feeling helps it to grip the inside of the shoe, allowing DASS and the shoe to move and work as one to enhance the benefits of both.

Direct: \$17.50 | MSRP: \$35.00
