

Sagis is dedicated to backing the Podiatric profession by providing clinics with the necessary tools and resources to offer the best care possible to their patients. Apart from our printed guides, Sagis offers easy-to-access biopsy videos and specimen-specific collection guides on our website. This platform boasts an impressive collection of educational resources, tools, and materials that assist Podiatrists in enhancing the quality of care they provide. Sagis is constantly striving to elevate our practices and set a new standard for Podiatry.

Select the specimen type below to learn the proper skin collection procedure.

Epidermal Tissue (epidermal tissue)	1
Der. Epidermal Tissue (epidermal tissue)	1
