SkinIntegra®

CLINICAL FACT SHEET

**PATENTED SKIN
BARRIER REPAIR
AND MAINTENANCE
COMPOSITION FOR
COMPROMISED SKIN**

**Patent Number:
10786441**

Abstract:

The composition comprises at least one lipid from a group consisting of lipids defined by a predetermined lipid profile and at least one nutrient selected from a group consisting of nutrients defined by a predetermined nutrient profile, but is substantially free of petrolatum. **This composition produced a surprising improvement when applied to cracked skin** of, e.g., diabetes mellitus patients or other individuals with dry or damaged skin.

SkinIntegra®

IN-VITRO TESTING VALIDATION

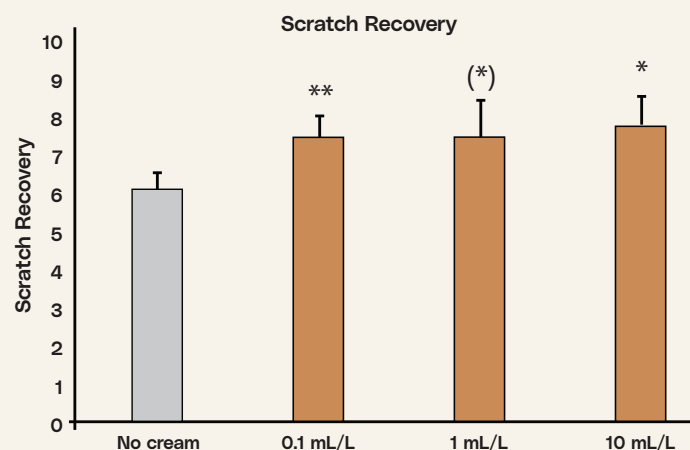

Efficacy in inflammation and wound healing

Cream is able to deliver mild antioxidant protection to living human cells, and protect them from the inside out when exposed to free radical stress

Scratch Recovery Test

Cream showed a mild but significant support of human skin cells in the repair of a scratch (in vitro wound healing model)

14-Day Patient Usage Case Series

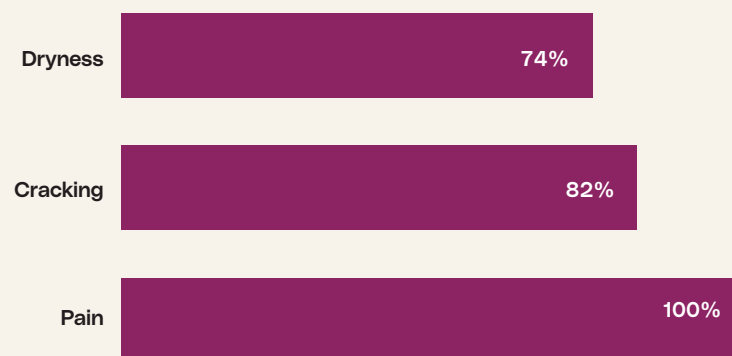

Study Design

- 14 subjects from 2 clinical sites
- Clinical investigators:
Dr. Guberman, D.P.M., Dr. Buratti, D.P.M.
- Clinical diagnosis of skin fissures, xerosis, and other compromised skin conditions
- 14-day trial with Rapid Crack Repair Cream
- Investigator assessment at baseline & 14 days, subject self-assessment at 14 days

Key Findings

- Investigator assessment at 14 days showed improvement in all key efficacy parameters: dryness, cracking, and pain
- Subject self-assessment at 14 days showed all subjects experienced relief

% Subject improvement after 14 days

% Subjects experienced relief after 14 days
