JD18	700 - 908	✓		✓

Watchdog Controls & the Big Stick remote gives the operator total control of the entire pumping system

- Cornell's 81022MP white iron pump
- 500+ gallons of fuel capacity
- 70° of steering capability for easy maneuverability
- Back axle undercarriage oscillates 40° to follow ground contours
- Heavy duty extended driveline
- Live hydraulics
- 10" flow meter
- Stainless steel hydraulic operated valves
- 12" pig loader with aluminum cap

Features:

Hand held wireless control operates all hydraulic functions when backing unit into lagoon pit

NO hydraulic hoses to plug into the tractor, just drop in hitch pin & back into lagoon. Hook up supply hose & you're ready to pump!

Combination front axle brakes, electric over hydraulic, air operated & parking brake.

Up to 75' overall length to reach the bottom of the deepest lagoon pits.

(2) Rear 700/50/R22.5 high speed flotation tires

(2) Front 445/65/R22.5 tires

NO hydraulic hydrostat force feed pump required

NO tractor PTO force feed required.

This means NO wasted horsepower, large fuel savings, LOWER operating costs, LESS maintenance needed.

.....Simply Efficient
