Auditor's Report & Financial Statement 15
A Message from our Chair

This is our third Annual Report. The COVID-19 pandemic continued unabated throughout this financial year. Its impact has had devastating effects on many charities, reducing fundraising income considerably. This was no less true for GO Girls. This has required us to think imaginatively to ensure we maintain our presence and meet our charitable objectives.

Even with these considerable and unforeseeable world adversities, GO Girls has continued to work hard. Despite the demands of our Chair’s day job working 6 days a week in the NHS and vaccine clinics, we achieved most of the objectives we set. However, we had to recognise that we had to hold some over to 21-22. This meant our work was re-focused to support women in lockdown.

We were delighted our Chair won a national award as the BJN Oncology Nurse of the Year 2020 for the work she has undertaken with GO Girls in raising awareness of gynaecological cancers and supporting women with these cancers.

As expected, with COVID19 spreading rapidly across the world, all planned events were cancelled from the start of 2020. Forthcoming event activity is also cancelled for our next financial year 20-21 to ensure the safety of our Trustees and volunteers. But we will come back stronger! But we so need your help too.

2020 saw a huge leap forward in digital care. For many cancer patients this has been a positive experience but for others they have missed face to face contact. The introduction of our online virtual support group has proved popular and a great way for women to connect as lockdown bit hard. We hope to look at enhancing this in the year ahead.

We should not forget over 21,000 women will be diagnosed with a gynaecological cancer each year, and of these 21 will die each day from a gynaecological cancer. With 58 women and their families receiving life changing news every day, we know there is much to do to support them. Alongside this we are working hard to raise awareness of all 5 gynaecological cancers, improve earlier diagnosis and diagnostics.

Whilst new treatments, such as PARP inhibitors are becoming more accessible in the treatment of ovarian cancer, survival is still limited. Evidence demonstrates that the psychological needs for these women is understandably great; this is where GO Girls fills a much needed gap. We want to ensure all women are supported as well as they can be, receiving high quality information and advice.

In October 2020, new NICE guidance recommended the testing for Lynch syndrome for all women diagnosed with endometrial cancer. The role of genomics is becoming increasingly important.

Gynaecological cancers, overall, have received much less media and public interest than breast cancer. However, it is encouraging to see much more connectivity worldwide showing strength in working together to ensure a unified voice. GO Girls must continue to seek to change to ensure there is greater parity in terms of both awareness and funds to support educating women now, and future generations, about their gynaecological health – we simply cannot stand still. Whilst it may seem difficult to talk about some of these issues, if we, as first pioneers cannot talk about it, then we will never create the change we want for younger women as well as optimising survival – earlier diagnosis is much more likely to improve survival rates, as we know, across all cancers.

We never forget every day why we are working so hard – to help those women who are diagnosed with a gynaecological cancer now, and for those who will be affected in the future.

I must thank a very dedicated and small team of Trustees who have worked and continue to work incredibly hard, giving their time voluntarily, to make our ambitions a reality – we have no paid staff and all Trustees have full-time ‘day jobs’: their commitment and professionalism never ceases to amaze me.

We hope you will support us in our journey. Thank you.

Hilary Maxwell
Trustees’ Report

Strategic Report

Achievements & Performance

In the last 3 years our membership has grown from zero to 777 via our online support group and we continue to grow daily as more women recognise the support we give.

We have produced 4 new awareness campaigns: Our animation: “Turn to” aiming to target women with gynaecological cancers knowing where they can “turn to” when diagnosed to access much needed support. The campaign was launched at the 2021 British Gynaecological Cancer Support (BGCS) Meeting. “Women’s Health Matters” to raise awareness of gynaecological cancers. “Inaya’s Story”: this campaign encouraged young women to understand the importance of the HPV vaccine and to educate young women to understand the role of cervical screening. We undertook an awareness campaign to educate women about PARP inhibitors (PARPis) as part of 2021’s March Ovarian Cancer Awareness Month. Genetics is continuing to play a significant role in cancer drug development and we are likely to read more about their role in future cancer treatments.

Additionally, we produced 6 educational videos to support women throughout the COVID19 pandemic.

GO Girls contributed, along with other key charities, to a significant piece of work to understand key concerns of gynaecological cancer patients during the COVID 19 pandemic and the role of cancer charities in supporting them. The work has been submitted for publication to the European Journal of Cancer and we are looking forward to seeing its publication in due course. We must offer our thanks to Professor Sundar and the team at Birmingham for their incredible work in this important
We are delighted to announce we have one further member who will join our Clinical Advisory Team, Ioannis Biliatis, Gynae-Oncology Surgeon. Mr Biliatis is a highly experienced gynae-oncology surgeon at University Hospitals Dorset. GO Girls remains evidenced-based and accurate in the information it provides. We know women require high-quality information for help inform decision-making.

We are hugely indebted to the many fundraisers who showed their support, and continue to show their support — by continuing to support us over an incredibly difficult 18 months.

Bob Ponchaud’s 630 mile walking challenge sadly got off to a quiet start due to the pandemic. Yet despite this Bob managed to raise over £3000 to support our women with ovarian cancer in memory of his wife, Carol.

The Inner Circle, Bridport, of which Carol had been an active member for many years, created an incredible quilt which was auctioned for over £600. Bob was keen to show that whilst ovarian cancer may affect women, those close to them were also keenly affected by the impact of the disease and also require much needed support.

Continued thanks must go to Jack Taylor, our designer, who has become an integral and much loved member of our team. We simply couldn’t do this without his support – he is making a huge difference to help us raise awareness of gynaecological cancers with his innovative and strong designs. We have forged effective and proactive relationships with allied charities and we aim to grow and develop those relationships in the next five years, believing collaborative working is key to creating change in a challenging area of health care where resources have historically not been easy to come by and where time and effort is being input by so few.

Alongside this, we have worked with key corporate partners who are helping our charity to grow by offering us support, guidance and professionalism.

**Priorities 2020-2021**

In 2020-2021 we set ourselves the following priorities.

- We will run Women’s Health Matters Campaign to support 2020 Gynaecological Cancer Awareness Month
- We will produce an animation and social media tiles to raise awareness of PARP Inhibitors
- We will produce two animations to support women with gynaecological cancers through COVID-19, together with a series of social media tiles
- We will produce 6 videos to support women with gynaecological cancers through the COVID-19 pandemic
- We will continue to support women via our online support group and introduce a weekly Thursday Q&A
- We will produce an animation on vulval cancer with supporting social media tiles
- We will produce an animation on recovering from cancer when treatment finishes
- We will begin to scope the implementation of a support telephone line or other interactive media

**Raising Awareness of Gynaecological Cancers**

**Women’s Health Matters**

**What we did:**

- We ran a successful awareness campaign in September 2020
- We produced social media tiles to support our campaign

**Ovarian Cancer Awareness Campaign 2021**

**What we did:**

- We ran a successful awareness campaign in March 2021 to raise awareness of PARP inhibitors and to educate women about these new drugs
- We produced social media tiles to support our campaign
- We had to defer our animation due to COVID 19, but it is included in our 21-22 plan.

**COVID19 – Supporting Women during the Pandemic 2020**

**What we did:**

- We produced an animation to educate women on changes to the healthcare environment during COVID 19
- We produced social media tiles to support our animation, alerting women to our “we are open” message.
- We produced 6 videos to support women on various aspects of gynaecological cancers and coping during COVID 19.
Additional Campaigns

Cervical Cancer Awareness 2021

What we did:

Inaya’s story
We produced an additional awareness campaign, Inaya’s story, to raise awareness of HPV and cervical screening, specifically targeting younger women.

We produced social media tiles to support our campaign.

To support Women with Gynaecological Cancers

We supported over 770 women with gynaecological cancers via our online support group.

We fulfilled our objective of introducing an online weekly chat for women. This proved popular in COVID-19 where women were often feeling very isolated and wanted more connection with others and face to face support.

Due to its popularity and interactive media now being an accepted format we feel this is an important step to continue and will resume this monthly now some forms of normality are returning to everyone’s lives.

Review of 20-21 Objectives

Due to the significant impact of COVID-19 and our work being taken away to address these needs both professionally and for the charity, as well as being involved in additional campaigns to support women at short notice, three of our objectives we have moved to 21-22.

Priorities 2021-2022

Looking Ahead

In 2021-2022

• We will continue to support women via our online support group and introduce a monthly “online interactive chat"
• We will produce an animation on vulval cancer with supporting social media tiles
• We will produce an animation on recovering from cancer when treatment finishes
• We will canvass our members on the impact of ovarian cancer on QOL during Covid
• We will raise awareness of Ovarian Cancer for March Ovarian Cancer Month
• We will scope the production of educational material to support women and their families

Our Fundraising

An incredible number of people have given to us.

We recognise that in 20-21 fundraising proved very challenging as the economic impact of COVID-19 bit. We hope that our loyal supporters will continue to value the work we do and the service we provide to many, many women and their families and feel that they can donate to us, no matter how small.

Working Effectively

As a small charity, we believe most of our funds should support our charitable objectives, minimising operational costs wherever we can. We have no paid staff. We are aware people work hard to fundraise on our behalves and as such these funds should support our aims. Alongside this we have forged strong links with other national gynaecological cancer charities, believing that we are stronger together and should support each other in achieving effective outcomes for women with gynaecological cancers. Jack Taylor, a talented young graphic designer, continues to provide our charity with incredible support and for this we are truly grateful.
Legal Entity

GO Girls is Trust registered with the Charity Commission no: 1179108. It was established on 9th July 2018. This is the third set of accounts the charity has prepared and this set of accounts covers the period 1 April 2020 to 31 March 2021.

Charitable Objects

The objects of the charity are to:

- Relieve sickness and to preserve health by
- Providing support to women with gynaecological cancers
- Managing an online support group forum
- Raising awareness of gynaecological cancers and their symptoms

From 1 April 2018, the Charities Act requires all charities to ensure that they meet their charitable objectives and that these are for the public benefit. The Charity Commission in its “Charities and Public Benefit” Guidance states that there are two key principles that must be met:

1. There must be an identifiable benefit
2. The benefit must be for the public or a section of the public.

The Trustees are satisfied that the aims and objectives of the charity and the activities reported on in this Annual Report meet these principles.

Management Structure

The Charity is run by a Board of five Trustees. Trustees are given an induction to the Charity and operations on appointment and guidance on the role and expectations of fulfilling this role are provided to each Trustee. A register is maintained of all Trustee declarations.
Our Trustees

Hilary Maxwell  
CEO & Chair  
With a nursing career spanning 15 years, including several roles as Matron, Hilary is currently a Gynae-Oncology Clinical Nurse Specialist at Dorset County Hospital Foundation Trust. She previously worked for BBC North and was Director at a GP Practice responsible for change, transformation and people management. Her charitable experience includes establishing the Jill Dando Fund with radio and television presenter, Nick Ross and working as Executive Director at The National Endometriosis Society (now Endometriosis UK). Passionate about improving the lives of women with gynaecological cancers, she co-founded GO Girls in 2015, to ensure all women and their families receive grass roots support at every step of their difficult journey. She is also a regular speaker on the international conference circuit on women’s health and gynaecological cancers.

Alastair Maxwell  
Treasurer & Trustee  
A highly accomplished and versatile IT project management professional, with over 30 years’ experience in the insurance sector. Alastair works on change programmes and manages defect deliveries, delivering to time and budget. He is also responsible for meeting industry Regulatory and Compliance governance. In addition, he brings his excellent interpersonal and communication skills, with an ability to build positive relationships to GO Girls.

Siobhan Griffiths  
Head of Communications  
Siobhan is a senior corporate communications and marketing consultant with over 25 years’ experience. She has devised strategic programmes and directed high profile public health campaigns for a range of healthcare charities, NHS hospital and primary care trusts and private healthcare organisations. Having obtained a BSc degree, she is also a qualified homeopath who specialises in working with people with cancer and is passionate about prevention and early diagnosis. She spent seven years working as a volunteer for the Paul D’Aria Cancer Support Centre and is an Associate Member of the Royal Society of Medicine.

Sharon McCartney  
Trustee  
Sharon is a qualified nurse, qualifying in 2007. She began her career as a Specialist Theatre Practitioner, working with our CEO and Chair, Hilary, at Stockport NHS Foundation Trust. Followed by further qualifications as a Health Visitor, completing her degree in Specialist Community Health Visiting at Manchester University in 2012, she now works as a Triage Nurse for the out of hours GP Service in Macclesfield.

Sharon is a campaigner at heart. When she saw GO Girls were planning a charity cycle ride to India she re-connected with Hilary and their adventures began. Sharon is very committed to promoting and contributing to the work of the GO Girls. She is skilled in standing up for others. As a Unison representative which involves representing and supporting members with employment disputes, she is used to ‘fighting for the underdog’.

Additionally, she is a nurse prescriber and has volunteered as a Nurse and Team Leader in Lourdes on a Pilgrimage from 2005 until 2015.

Annette Pitman  
Trustee  
Annette is an experienced fundraiser and organises numerous events to raise money throughout the year. She worked on her first fundraising event in 1990, in order to set up a toddler group, which she still runs today in partnership with a friend. Events she has organised range from Southover Fete at Southover House, Strawberry Fayre and Tolpuddle Street Fayre to Charity Cycle Rides abroad, helping individual applicants with their own fundraising efforts. She trained as a hairdresser and Indian Head Massage therapist and is also a qualified interior designer.
Related Party Disclosures

Hilary and Alastair Maxwell were reimbursed for expenses related to the running costs of the charity. We are looking to resolve issues with our Bankers to facilitate online banking and hope to make progress in 21-22 as this was postponed in 20-21 due to the pandemic.

GDPR

Everyone has a right to have their privacy respected. GO Girls do not use those who contact the charity for marketing campaigns nor are details passed to third parties.

Risk Management

As a young charity we are committed to putting into place effective measures to acknowledge our risks and manage these.

To support protecting the charity’s future and commitment to its charitable objectives we have:

- Developed a five year strategic plan: this is approved by all Trustees
- We have established an annual budget for all income and expenditure and is approved by all Trustees, ensuring we have sufficient reserves to protect the charity's future.
- We have established sub-committees amongst the Trustees to support key areas of the charity’s management. These include: Finance, Operations & Governance, Communications, Fundraising, Support & Engagement
- We have established a Fundraising Strategy: this is approved by all Trustees.
- We have established a Communications Strategy: this is approved by all Trustees
- We have identified a number of risks and the Trustees are establishing management strategies to mitigate these risks.
- We have identified the following principal areas of risk:

Funding

- Failure to design and deliver effective programmes resulting in insufficient number or value of high quality grant applications or fundraising activities. To mitigate this risk we are considering engaging a professional fundraiser to support and guide our application processes. The Trustees abide by the Fundraising Code of Practice and is registered with the Fundraising Regulator and anyone engaged by GO Girls will be bound by this Code.

Operations

- Failure to develop succession plans for Trustees. To mitigate this risk, we are developing a plan to look at how we wish to maintain an effective Board of Trustees with the depth and breadth of skills required to maintain effective operations.
- Failure of the existing Board of Trustees to successfully meet the Charity's objectives through the five-year strategic plan due to Trustee limitations and time. To mitigate this, the Trustees will formulate a plan to engage a full-time paid CEO and seek funding for this.
- Malicious cyber-attacks resulting in data security breaches or corruption/ destruction of data held in the Charity's IT systems. To mitigate this risk, we have conducted a review of cyber security, including penetration testing, passwords and testing
Reference and Administrative Details: Acknowledgements

GO Girls is an independent charitable Trust. Our charity number is 1179108. Our registered office is 44 The Ridgeway, Upwey, DT3 5QQ.

GO Girls is registered with the Fundraising Regulator.

Adam Rosenthal
Consultant Gynaecologist and Associate Clinical Professor
University College London

Adam Rosenthal PhD FRCOG is a Consultant Gynaecologist and Honorary Associate Clinical Professor at UCLH, where he directs the Familial Gynaecological Cancer and Colposcopy services. His clinical interests are gynaecological and anal pre-cancers, colposcopy, laparoscopic surgery and inherited (familial) gynaecological cancers. He is also the Clinical Lead on the UK Familial Ovarian Cancer Screening Study and Medical Director of the Avoiding Late Diagnosis in Ovarian cancer (ALDO) project. A past member of the UK Cancer Genetics Group Steering Committee, he has published extensively on screening for gynaecological cancers and their molecular biology, in journals including the Lancet and the Journal of Clinical Oncology. He is a medical advisor to various charities, including the Eve Appeal and Ovacome. An acknowledged expert on inherited gynaecological cancer, Adam has given interviews on TV and radio on this specialist area.

Professor Charlie Gourley
Consultant Gynaecologist and Associate Clinical Professor
University of Edinburgh

Charlie Gourley graduated in Genetics and Medicine from Glasgow University in 1991 and 1994 respectively. From 1998 to 2005 he trained in Medical Oncology at the Edinburgh Cancer Centre, during which time he was awarded a PhD in ovarian cancer genetics (Edinburgh University) and an NHS Education for Scotland Clinician Scientist Award (2004). Charlie was appointed Senior Lecturer in Medical Oncology at the University of Edinburgh Cancer in 2005, Reader in Medical Oncology in 2011 and Professor of Medical Oncology (Personal Chair) in 2012. He received a Scottish Senior Clinical Fellowship Award in 2010. He became Director of the Nicola Murray Centre for Ovarian Cancer in 2016 and Clinical Director of the Cancer Research UK Edinburgh Centre in 2019. He is the current chair of the Gynaecological Cancer Intergroup (GCIG) Translational Committee and is a member of the Scottish Medicines Consortium and the German Cancer Aid Scientific Review Committee. He previously sat on the Scientific Evaluation Committee, Institut National du Cancer in France, the Cancer Research UK Experimental Medicine Expert Review Panel as well as the Commission on Human Medicines Oncology and Haematology Expert Advisory Group.

Charlie is active in ovarian cancer clinical trials. He was UK lead for the SOL01 trial which led to the first line licence for olaparib in BRCA mutant ovarian cancer and for the recently reported GOG281/LOGS trial of trametinib which is the first ever positive randomised controlled trial in low grade serous ovarian cancer. He sits on the trial management group of a number of UK ovarian cancer trials including ICON9, CENTURION and PEACOCC. He provides leadership on the translational aspects of these studies as well as commercial studies such as PISARRO and PRO-105.

Professor Gourley's translational research focuses on genomic characterisation of ovarian cancer in order to facilitate the discovery of biomarkers of ovarian cancer drug sensitivity and resistance. Current priorities include whole genome sequencing of ovarian cancer tumours from across Scotland in order to improve patient selection for PARP inhibitors and exomic sequencing of low grade serous ovarian cancers from patients recruited into the GOG281/LOGS study in order to improve patient selection for MEK inhibition. His lab group includes two postdoctoral fellows, one senior scientist, three PhD students, a data manager, a tissue collector/processor and a scientific officer.
Professor Emma Crosbie  
Gynaecologist & Clinical Senior Lecturer  
Saint Mary's Hospital, Manchester and Manchester Hospital

Professor Crosbie graduated as the top performing woman student at the University of Edinburgh Medical School in 1997. Following her pre-registration house jobs, Professor Crosbie began her career in Obstetrics and Gynaecology as a Senior House Officer at Edinburgh Royal Infirmary. In 1999, she moved to Manchester to work at the Paterson Institute for Cancer Research and Saint Mary's Hospital as the Joseph Starkey Clinical Research Fellow under the supervision of Professors Peter Stern and Henry Kitchener. In 2002, she was awarded a PhD in Gynaecological Oncology by the University of Manchester. Professor Crosbie returned to full time clinical training as a Senior House Officer and then Specialist Registrar in Obstetrics and Gynaecology in the North West in 2002. In 2006, she successfully gained Membership of the Royal College of Obstetricians and Gynaecologists. In 2008, she became a Walport Clinical Lecturer in Gynaecological Oncology, combining subspecialty training in Gynaecological Oncology with research. In 2013, Professor Crosbie was awarded an NIHR Clinician Scientist Fellowship and became a Senior Lecturer and Honorary Consultant in Gynaecological Oncology at the University of Manchester.

Professor Ranjit Manchanda  
Professor of Gynae-Oncology & Consultant Gynaecological Oncologist  
Queen Mary University London & Barts Cancer Institute

Ranjit Manchanda (MD, MRCOG, PhD) is a Clinical Senior Lecturer at Barts Cancer Institute, QMUL, and Consultant Gynaecological Oncologist at Barts and the Royal London Hospital.

Ranjit’s research interests are focused around population based germline testing and precision medicine approaches for risk prediction, stratification, and targeted screening & cancer prevention. He has a keen research interest in health economic issues related to his areas of research. He is the Principal Investigator on the PROTECTOR trial (salpingectomy for ovarian cancer prevention in high-risk women), PROMISE Pilot study (Feasibility of population-based risk prediction and stratification for targeted ovarian cancer screening and prevention), GCaPPS trial (RCT on population based BRCA testing in the Jewish population), and SIGNPOST study (evaluating outcomes of germline panel and somatic tumour testing in ovarian cancer). He leads the Barts Women’s Precision Medicine and Cancer Prevention Team and chairs the Barts Health Gynae- oncology trials group. He is co-Lead for the Cancer Prevention Theme at the Barts CRUK Cancer Centre. He is a member of the NCRI Ovarian Cancer Surgical Sub group, and a number of other advisory bodies and oversight committees. He has served as President of the European Network of Young Gynaecological Oncologists (ENYGO) and member of the European Society of Gynaecological Oncology (ESGO) Council from 2011-2013. He has a strong interest in training in gynaecological oncology and led a number of training initiatives in and outside Europe. He is a member of the International Gynecological Cancer Society (IGCS) Education Steering Committee and BGCS International Subcommittee. He is the Integrated Academic Training Programme Director for North Central and North East London, London Specialty School of Obstetrics & Gynaecology.
Mr Jonathan Lippiatt
Consultant Gynae-Oncology Surgeon
Poole General Hospital

Mr Lippiatt is a consultant Gynaecologist and Gynaecological Oncologist. He completed the general training programme in Obstetrics & Gynaecology and then did a further two years subspecialising in gynaecological cancer. His training was largely at the University Hospital of Wales, Cardiff, during which time he was also appointed as a clinical lecturer for Cardiff University and obtained a Doctorate of Medicine for his research into HPV and cervical disease. Mr Lippiatt was the first British subspecialty trainee to undergo a robotic surgery training fellowship in the UK. In his first year as a consultant at Poole Hospital, Mr Lippiatt set up an advanced laparoscopy service to treat endometrial and cervical cancer. This has meant less pain, quicker recovery and far shorter length of stay in hospital. This has improved even further with the introduction of a robotic surgery service to the women of Dorset and the surrounding area. Mr Lippiatt now routinely treats endometrial and cervical cancer patients using the very latest state of the art surgical robot. He is a founding member and co-chair of the robotic implementation group at Poole hospital. He is also on the council of the British and Irish Association of Robotic Gynaecologists and a member of the Society of European Robotic Gynaecological Surgery. Mr Lippiatt is involved in several research projects including being Principal Investigator for a large surgical trial for endometrial cancer. He is an Associate Professor at St Georges Medical School, Grenada and regularly has students from Grenada as well as Southampton and King's medical schools.

Professor Gordon Jayson
Professor of Medical Oncology
Christie Hospital, Manchester

Professor Jayson qualified in Medicine at the University of Oxford and then completed his general medical and oncology training in Manchester. Having completed a PhD in heparan sulphate and angiogenesis, he took up a Senior Lecturer position in 1997 at The Christie and The University of Manchester, specialising in ovarian cancer and angiogenic drug development. He has led or written numerous phase I-III ovarian cancer trials. Taking up a Chair in Medical Oncology in 2005, he has served on Cancer Research UK’s New Agents Committee, the Medical Research Council’s Drug and Device Development Committee and the National Clinical Trials Committee.

Professor Jayson is now Chair of Translational Research for the Medical Research Council ICON7 and chairs Manchester Cancer Systemic Anti-Cancer Therapy Board, developing a strategy for systemic therapy across Manchester. He has written over 190 publications and has attracted tens of millions of pounds of grant income, focusing on ovarian cancer and angiogenic drug development.

Ms Beena Dandawate
Consultant Gynaecologist
Dorset County Hospital

Miss Dandawate specialised in Obstetrics and Gynaecology in 1999 with honours' and was awarded a Gold medal for best outgoing Registrar of the Year in India. She is a Consultant Obstetrician and Gynaecologist at Dorset County Hospital NHS Foundation Trust, with a special interest in gynaecological oncology, major gynaecological surgery, colposcopy, acute gynaecology and early pregnancy. As a highly skilled surgeon, she is the pioneer in starting an enhanced recovery pathway for gynaecology surgical patients which has had a huge impact on patient recovery and satisfaction. Miss Dandawate has been conducting outpatient hysteroscopies and manages early cancer cases and is currently the only private female gynecologist in Dorset.
Amy Hill
MacMillan GP

Dr Hills has 12 years of experience as a GP locum, salaried GP and partner. She holds additional qualifications in child health, obstetrics and gynaecology and family planning. She has extensive experience in urgent and unplanned care and has worked as a Clinical Supervisor for South West Ambulance Trust out of hours service for over 10 years. She is employed as a GP facilitator by Macmillan as part of Wessex Clinical Networks. She has a keen interest in healthcare planning and is the elected Local Medical Council representative for Weymouth and Portland. She has recently started working in the field of occupational medicine providing Armed Forces entry and private industry pre-placement, sickness and DVLA medical reports.

Helen Savage
Gynae-Oncology Clinical Nurse Specialist
Christie Hospital, Manchester

Helen qualified as a nurse in 1997. She currently works as a Macmillan Gynae-Oncology Clinical Nurse Specialist at The Christie NHS Foundation Trust in Manchester, where she has worked since July 2017. She provides information, advice and support to women and their families with gynaecological cancers from diagnosis, through treatment and palliative care. In collaboration with the medical and nursing staff, she monitors the clinical care of patients and provides clinical support to improve patient care and patient outcomes. Prior to her current role, Helen had 8 years’ experience with the surgical oncology team.

Hilary Maxwell
Gynae-Oncology Clinical Nurse Specialist
Dorset County Hospital

With a nursing career spanning 13 years, including several roles as Matron, Hilary is currently a Gynae-Oncology Clinical Nurse Specialist at Dorset County Hospital Foundation Trust. She previously worked for BBC North and was Director at a GP Practice responsible for change, transformation and people management. Her charitable experience includes establishing the Jill Dando Fund with radio and television presenter, Nick Ross and working as Executive Director at The National Endometriosis Society (now Endometriosis UK). Passionate about improving the lives of women with gynaecological cancers, she co-founded GO Girls support group in 2015, to ensure all women and their families receive grass roots support at every step of their difficult journey. She is also a regular speaker on the international conference circuit on women’s health and gynaecological cancers.
