GLYM®

The Ceramic Counterpart to the Proven Sprint® Family

GLYM® combines the proven performance of the Sprint® family with natural aesthetics that truly pay off. This all-round ceramic bracket does more than simply claim to be invisible: its high-quality translucent ceramic blends harmoniously with the natural tooth color, creating a subtle, discreet appearance. At the same time, GLYM® delivers the qualities that matter most in everyday clinical practice: reliable performance, outstanding patient comfort, and excellent economic efficiency.

Gentle in comfort. Strong in performance.

1. **Natural aesthetics**
   The translucent ceramic blends seamlessly with the natural tooth color for a subtle, discreet appearance.
2. **Comfort patients can feel**
   The rounded low-profile design and smooth surfaces provide outstanding comfort throughout treatment.
3. **Reliable bond strength**
   Secure adhesion helps reduce the risk of debonding and supports a smooth, efficient treatment process.
4. **Precision for everyday practice**
   The thoughtfully engineered design allows for easy handling and consistently reliable clinical outcomes.
5. **Strong to the finish**
   The homogeneous ceramic structure provides excellent fracture resistance and long-lasting durability, even under the demands of daily clinical use.

Discreet in the mouth. Exceptionally reliable.
