

invis is transforming treatment planning.

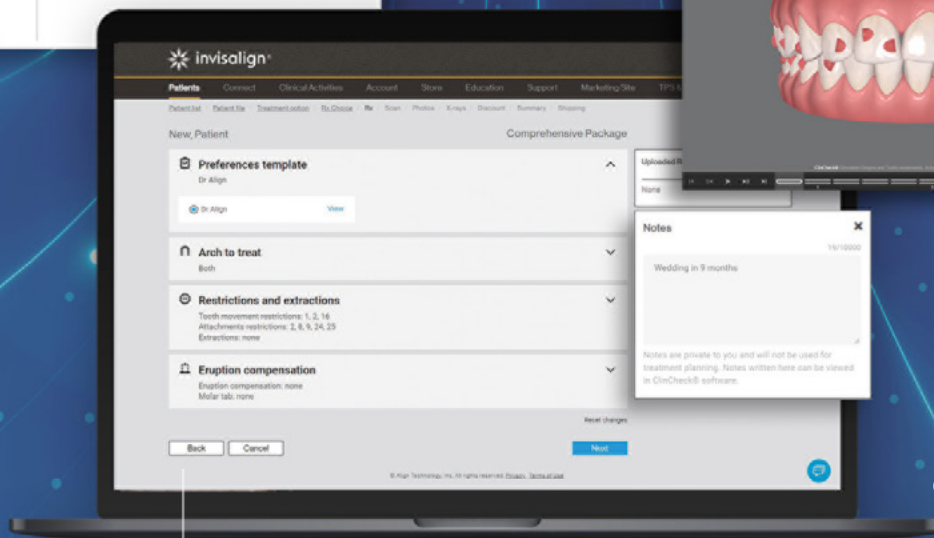

Invisalign® Personalised Plan (IPP)

Get consistent initial ClinCheck® plans using Invisalign Personalised Plan, your customised case-type preferences template which **unlocks Flex Rx Prescription Form and Plan Editor**.

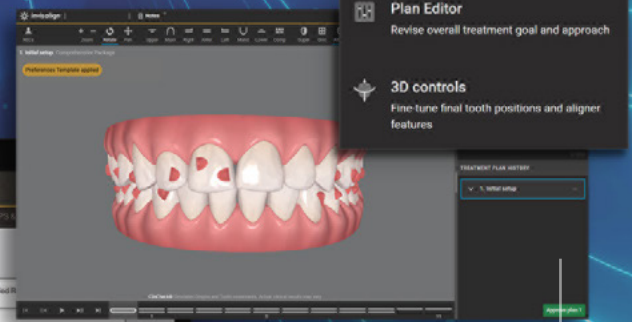

Dr. Align preferences template

Deep Bite 3 preferences	1 For initial overbite of more than 2 mm, measured as the average of both upper centrals, target overbite to 2 mm at the end of treatment
Open Bite 2 preferences	2 Automatic placement of precision bite ramps for lower intrusion
Cross Bite 4 preferences	3 Correct deep bite by intrusion of upper and lower anterior teeth and extrusion of upper and lower posterior teeth with heavy contacts at the end of treatment
Crowding 3 preferences	

Flex Rx Prescription Form

Fill in a simplified case submission with the redesigned Flex Rx prescription form.

Plan Editor

Change treatment approach with Plan Editor or make modifications with 3D Controls on your own. See and approve changes in minutes with ClinCheck Live Update.

Get power and time back in your hands with Invisalign Personalised Plan (IPP).

With Invisalign Personalised Plan, your custom clinical treatment preferences are programmed into a unique template and applied automatically to each initial ClinCheck® treatment plan. Collectively, these next-generation tools transforms the entire Invisalign Digital treatment planning process, giving you **consistency, efficiency** and **control**.

How it works

Case submission process

Preferences Templates

1. Your custom case-type preferences are captured in a survey and are programmed into a template for use at case submission.

Simplified case submission

2. Fill out the redesigned, one-page, patient-specific Flex Rx prescription form and add notes for use during case review.

Consistent ClinCheck® set-ups

3. Receive initial plan with your case-type preferences automatically applied. Update and review your case-type preferences regularly with the IPP team.

Case review and modification

Review and modify plan as needed

4. Make and view changes in minutes using real-time modification tools.

Plan Editor

5. Make significant plan approach changes yourself in minutes using Plan Editor and ClinCheck Live Update.

3D Controls

6. Make precise changes using 3D Controls. See and approve changes directly with ClinCheck Live Update.

Key benefits

Consistent quality that can be counted on

Receive ClinCheck setups the way you expect with your treatment preferences incorporated, bringing you closer to final plan approval.

When doctors use Invisalign® Personalized Plan and ClinCheck Live Update, ClinCheck® treatment plans require less than half the requested modifications.¹

Save time with greater efficiencies

Invaluable time savings, significantly fewer submission steps, and the ability to view changes in minutes, not days.

Initial ClinCheck® treatment plans are available 56% faster for doctor review when submitted with IPP or another preferences template.²

Unparalleled levels of control

Our customisation tools give you a wide range of flexibility to write notes to refresh your memory during case review, make modifications, create alternative treatment plan approaches, and view and approve changes directly with the simple click of a button.

The majority of initial ClinCheck treatment plans submitted with IPP were available for doctor review within 6 hours or less.³

¹Based on Invisalign comprehensive treatment option primary orders from doctors who used Invisalign® Personalized Plan in at least 50% of their comprehensive orders. Total orders analyzed is 10,992. Modifications are measured as the number of times a treatment plan was sent back to a CAD designer before plan approval. The comparison is between the aggregate of orders with Invisalign® Personalized Plan and ClinCheck Live Update and the aggregate of orders without Invisalign® Personalized Plan and ClinCheck Live Update. The modification rate is 57% less for the aggregate of orders with Invisalign® Personalized Plan and ClinCheck Live Update. Orders were approved from November 2022 through April 2023. Includes Invisalign trained doctors in the NA, LATAM, EMEA, and APAC regions. Data on file at Align Technology, as of October 12, 2023.

²Based on Invisalign comprehensive treatment option primary orders from doctors who were activated with a treatment planning preferences template. Total orders analyzed is 487,926. The comparison is between orders submitted using a treatment planning preferences template and orders submitted without. Time is measured from when an order is received until the ClinCheck plan is available for doctor review. The time taken for orders submitted using a treatment planning preferences template is 56% less. The median value was used. Orders were from the period April 2022 through May 2023. Includes Invisalign trained doctors in the NA, LATAM, EMEA, and APAC regions. Data on file at Align Technology, as of October 12, 2023.

³Based on Invisalign comprehensive treatment option primary orders by doctors who submitted using a treatment planning preferences template. Total orders analyzed is 173,028. Time is measured from when an order is received until the ClinCheck plan is available for doctor review. 50.2% of orders were available for review under 6 hours and the median time was 5.92 hours. Orders were from the period April 2022 through May 2023. Includes Invisalign trained doctors in the NA, LATAM, EMEA, and APAC regions. Data on file at Align Technology, as of October 12, 2023.
