angel aligner™

Intelligent Ceph System

Next-Level Cephalometrics

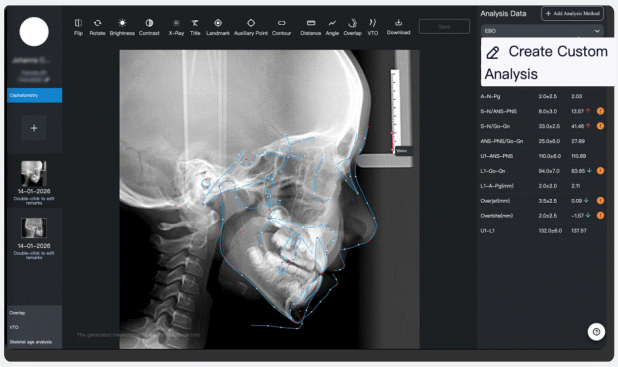

- Create and implement your personalised cephalometric analysis methods tailored to your clinical needs.
- Easily share your custom templates with colleagues for immediate use or import shared templates from your peers.

Available now!

Automate cephalometric analysis with individualised diagnostic views and standardised workflows to improve decision-making, streamline diagnostics, and reduce manual work.

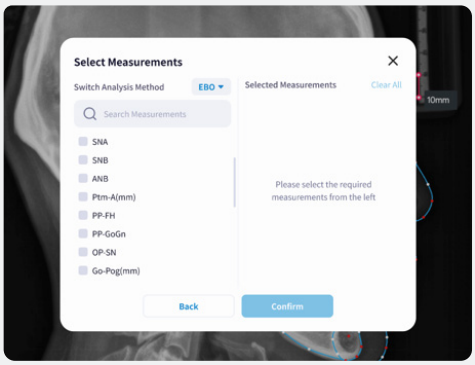

Create and Implement

1.

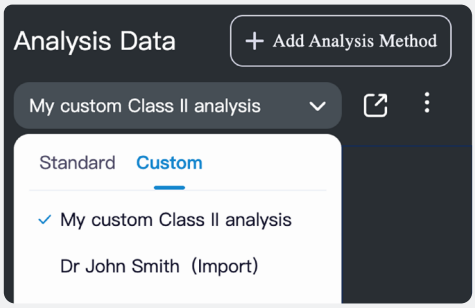

Click “Add Analysis Method”, then select “Create Custom Analysis” and enter a name.

2.

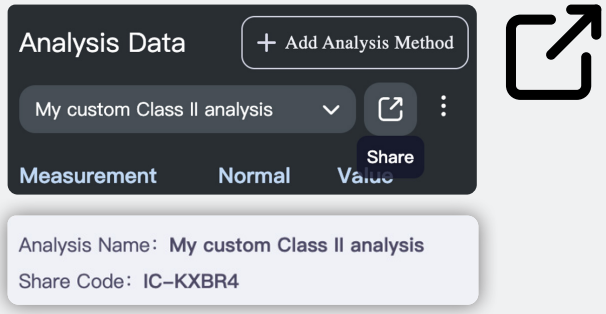

Configure the measurement items tailored to your clinical needs, then save.

3.

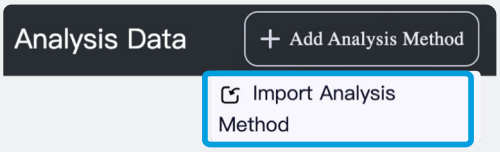

Your custom analysis method will appear under “Custom” in the dropdown.

Share and Import

To share your analysis method, click “Share” to generate a code.

To import, select “Import Analysis Method”, paste the code, and click “Import”.
