Key features:

Australian made quality.

Dual cylinders increase speed,
efficiency & grabbing force.

Interlocking straight-edge design
maximises grabbing efficiency.

Collection area allows for
multiple pulls before unloading

Fast access to spare parts and
after sales service.

Durable

Designed and manufactured with quality materials in Australia to be strongest and easiest to operate brush puller on the market.

McCormack has been a reputable manufacturer since 1984 with second to none after sales service and support.

Machine Versatility

The brush and tree puller is highly versatile, compatible with tractors (35hp+), skid steers, telehandlers and wheel loaders up to 15t.

Whatever machine you have on your property, we've got a model to fit it.

BRUSH AND SMALL TREE PULLER

**SEE THE
3D MODEL**

**SPECIFICALLY DESIGNED
TO HANDLE THE TOUGHEST
VEGETATION AND
AUSTRALIAN CONDITIONS.**

Fit-for-purpose.

The McCormack Brush and Small Tree Puller is engineered to enhance operator efficiency and minimize the time required to remove deep-rooted plants, thereby reducing the need for multiple pulls and double handling.

Better by design.

1 The straight edge with overlapping channels ensures a robust grip without breaking stems or allowing material to slip, unlike serrated designs. The McCormack model enables faster and more efficient work.

Twice the power

2 The twin cylinder design has a number of benefits.

The McCormack Brush Puller offers twice the grabbing power of single-cylinder models, ensuring stems remain secure even under challenging conditions.

Single-cylinder models necessitate precise alignment of the brush or trunk against the fixed arm, with the moving arm closing against it. Misalignment can reduce grabbing force, requiring repositioning. In contrast, the dual-cylinder design of the McCormack Brush Puller allows for straightforward operation—simply drive in and pull.

Specifications:

Model	Width	Length	Weight
Tractor & Skid Steer	1170mm	1220mm	180 kg
Telehandler & Wheel Loader	1550mm	1800mm	480 kg
