Key features:

Australian made quality.

Optional wings & hungry board.

Lift cylinders.

Manual & hydraulic options available.

Up to 3000mm width.

500mm tall blade.

⚡ Two Models

Over axle blades provide better ground clearance and visibility for maneuvering around obstacles, while under axle models offer a lower center of gravity for enhanced stability and pushing power.

» Versatility

Over axle blades excel in varied terrain, while under axles provide stronger ground engagement for efficient grading and land clearing.

AXLE MOUNTED BLADES

Over Axle Mounted Blades

A heavy-duty attachment designed for efficient land clearing and grading. Mounted directly over the axle, it provides superior strength and pushing power, making it ideal for tough conditions. Featuring a 500mm high dozer, it ensures effective debris management. With a 750mm lift height and optional hydraulic adjustments, this Australian-made blade offers versatility, durability, and reliable performance for tractors in demanding applications.

Features:

- Designed for tough land clearing and grading applications.
- Provides superior strength and pushing power for efficient operation.
- 500mm tall blade.
- Offers a 750mm lift height for improved versatility.
- Optional wing accessories extend the working width for increased efficiency.
- Available with manual or hydraulic tilt and angle control for flexible operation.

Under Axle Mounted Blades

A robust and efficient attachment designed for land clearing and grading tasks. Positioned beneath the axle, it lowers the center of gravity, improving stability and pushing force. Equipped with a 500mm high dozer blade, it effectively handles debris while ensuring smooth operation. Offering a 500mm lift height and optional hydraulic adjustments, this Australian-made blade is engineered for versatility, durability, and long-lasting performance in tough agricultural and earthmoving environments.

Features:

- Engineered for efficient land clearing and grading.
- Provides enhanced stability and pushing power.
- 500mm tall blade.
- Offers a 500mm lift height for flexible operation.
- Optional wing accessories extend the working width for increased efficiency.
- Available with manual or hydraulic tilt and angle control for flexible operation.
