SILAGE BUCK RAKES

McCormack Industries manufactures Buck Rakes are designed for handling all silage.

The McCormack Industries **Silage Buck Rakes** are simple and efficient attachments, designed for stacking and handling silage. The Buck Rakes feature a row of spears or steel tines that collect silage, ensuring minimal waste. These attachments can also be fitted with a three-point linkage, providing added versatility.

Key features:

Effective Silage Management

Push-Off Model Available

Australian Made Quality

High Capacity

Standard vs Push-off

The hydraulic push-off system enables controlled and gradual raking and release of silage, in comparison the standard system only removes the silage through tipping the buck rake down on an angle.

Durability

The spears and bushes in the main pivot on all buck rakes are replaceable, ensuring long-lasting durability.

SILAGE BUCK RAKES

⚡ Maximise Silage Capacity

The push-off feature is particularly advantageous in silage pits, providing greater reach and maximising storage capacity. The spears and bushes in the main pivot are replaceable, ensuring long-lasting durability.

» Push-Off Capability

McCormack Industries **Push-Off Buck Rake** is designed with a hydraulic push-off system. It specialises in allowing controlled and gradual raking, enabling a more efficient compaction within silage pits. Equipped with durable steel tynes, the **Push-Off Buck Rake** works perfectly to collect silage during its stacking process.

Specifications:

	Standard Buck Rake	Push-Off Buck Rake
Width	2400-3400mm	3320mm
Height	1280mm	1729mm
