

## **GENETICS**

Nepalese x North Indian.

## **EFFECTS**

Very creative mild high with a balanced and long lasting body feeling.

## **FLOWERING INDOOR**

8 weeks, with a yield up to 850 gr/m<sup>2</sup>.

Long internodes, long branches, best results when developed to full size.

Good for LST.

## **FLOWERING OUTDOOR**

Ready by the end of September (North hemisphere) with a production up to 1350 gr/plant.

Tall, strong plant, needs support due to the extremely dense buds.

Ideal for mountain areas, resists well to cold.

## **AWARDS**
