

GENETICS

Lemon Skunk x Super Silver Haze.

EFFECTS

A very citrus-like haze, works fast and lasts long.

It is a very powerful high, very balanced between a physical and a cerebral side.

FLOWERING INDOOR

10 weeks, with a production up to 800 gr/m².

Medium-tall plant, long and wide branches, ideal for ScrOG or LST.

FLOWERING OUTDOOR

Finishes by mid-October (North hemisphere).

Production can reach 1200 gr/plant.

Ideal for equatorial, tropical, subtropical and temperate climates.

Tall plant, needs support.
