Myriad Radio Automation

Radio Playout & Automation Software

The Myriad Radio Automation software offers studio focused playout and automation for radio stations of all sizes.

By blending powerful features with an intuitive, customisable interface, Myriad Radio Automation allows you to forget the technology and focus on making great radio.

Key Features

- Powerful radio playout for live shows & automation.
- Advanced local and web Voice Tracking.
- Professional music, jingle & commercial scheduling.
- Auto-generated content with AI Voice Links.
- Optional web interface for remote live shows.
- Multi-station playout, scheduling & asset management.
- Scalable, robust and built for on air talent!

www.myriad.radio

The Myriad Ecosystem

Myriad Radio Automation is the heart of the Myriad Ecosystem which covers all aspects of modern radio including playout & automation, scheduling, radio news, audio logging, cloud radio, streaming, websites, mobile apps & more. All working together seamlessly to provide a complete radio solution.

- ✓ Complete solution.
- ✓ Built for radio stations.
- ✓ Single or multi-station.
- ✓ Option for split playout.
- ✓ Customizable UI.
- ✓ Scales from single studio to full enterprise solution.
- ✓ Trusted by 1000's of broadcasters.

KEXP redefines live radio with Myriad versatility

– REDTECH Feature Article, May 2025

“After a series of entertaining conversations with various vendors, we stumbled across Broadcast Radio’s booth,”
“It was immediately clear that Myriad was the solution we were looking for.” – Nel Jee Ae Na, KEXP Seattle

Myriad Cloud Radio

Professional Cloud Radio – Built For Everyone

Myriad Cloud Radio is the world's first professional grade radio software, designed for 24/7 operation and running natively in the Microsoft Azure cloud. Running radio stations has never been easier.

Zero studios, zero infrastructure & zero compromise!

Key Features

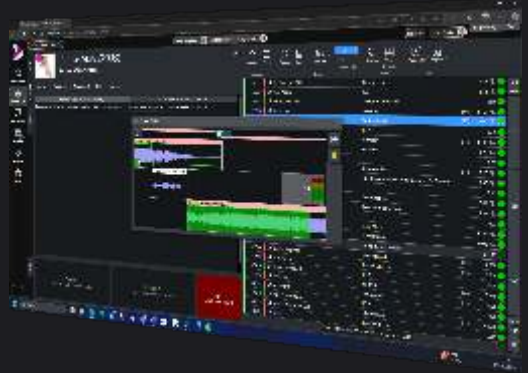

- Advanced radio playout and automation.
- Professional, clock & rule based scheduling.
- Powerful Voice Tracking and contribution.
- Live, interactive shows with multi-DJ's & guests.
- Fully browser based for PC or Mac.
- Technology used by thousands of broadcasters worldwide.
- Take your station to the next level.

www.myriad.radio

Truly Professional & 100% Cloud

Myriad Cloud has been built from the ground up, using the same base software as Myriad Playout meaning that virtually all tools and features from our award winning radio software, are carried over to Myriad Cloud, running natively on the MS Azure platform.

- ✓ Professional Playout & Automation.
- ✓ Advanced Content Scheduling.
- ✓ Live Shows & Outside Events.
- ✓ Voice Tracking & AI Voice Links.
- ✓ Content & Station Management.
- ✓ 100% Browser Based.
- ✓ Streaming & Web Player.
- ✓ Optional Websites & Mobile Apps.

Studio/Cloud Hybrid Radio

Get The Best Of Both Worlds

Hybrid Radio combines the traditional physical radio studios with cutting edge cloud technology to deliver an ultra robust, professional radio platform offering the best of both worlds. Live shows can come from your studio and all other content originates in the cloud, offering the benefits of both solutions.

Key Features

- Combines Myriad Cloud with traditional Myriad Payout software.
- Content, schedule & settings are replicated bi-directionally.
- Live studio shows can be ingested by Myriad Cloud for broadcast.
- When you finish your live studio shows, switch off all your equipment, turn the lights off and walk away!
- Doubles as an 'always ready' Myriad Disaster Recover system.

www.myriad.radio

Myriad Anywhere

Remote Admin, VT & Live Shows

Myriad Anywhere enhances your Myriad Automation system (full Myriad license required), to control every aspect of your radio station, from anywhere in the world via your web browser. Present live shows from the beach, upload content and Voice Tracks from the sofa and manage your schedule from your back yard. The choice is yours!

Key Features

- Access every aspect of your Myriad Playout system from your web browser with Myriad Anywhere.
- Remote Voice Tracking & Log editing.
- Remote Live Shows with multiple DJ's & guests.
- Build & manage your schedule.
- Upload & manage content.
- Station admin, scheduling & user management.
- All from Anywhere and on virtually any device.

www.myriad.radio

Myriad Schedule Pro

Music, Jingle & Commercial Scheduling

Myriad Schedule Pro is a professional radio scheduling system that uses Clocks, Rules and Category Decks to allow you to schedule music, jingles and commercial spots for your radio station. Myriad Schedule Pro is fully integrated with **Myriad Radio Automation** and compatible with **all major 3rd party** automation systems.

Key Features

- Clock, Rule & Deck based scheduling for music, jingles & commercial spots.
- Goal driven scheduling.
- Configurable categories, tags, characteristics & attributes.
- Powerful & flexible rules.
- Stand alone application & built into Myriad Playback.
- Dedicated commercial spot scheduling.
- Expandable with Schedule Plus and Myriad Anywhere web interface add-ons.

www.myriad.radio

Myriad News

Radio Newsroom Platform

Myriad News is a hybrid radio newsroom system that combines 'on-site' software to capture and manage traditional 'wire feeds' with a cloud based portal for viewing and editing content, creating new stories, compiling bulletins and even recording news breaks that can be automatically uploaded to your station's automation system & website.

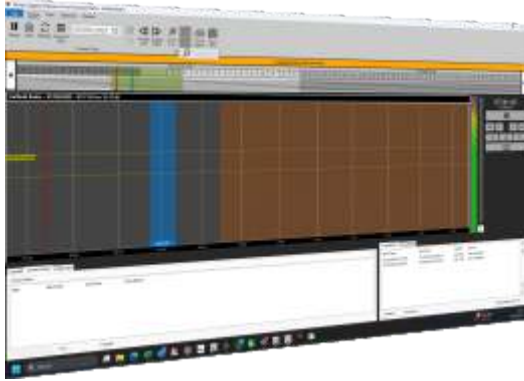

Key Features

- Capture news from 'wire feed' services & RSS feeds.
- Edit captured content and create your own unique news stories.
- Enhance stories with audio cuts and images.
- Create bulletins for your news breaks.
- Read scripts and play audio in live news breaks or recorded bulletins.
- Access via web browser on PC or Mac to create content, compile bulletins and record news breaks.

www.myriad.radio

Myriad Logging

On Premise Audio & Metadata Logging

Advanced, on-premise multi-station audio and data logger/skimmer, offering virtually instant access to audio and data across all your stations throughout the configurable logging period. Extract content manually or schedule automatic extractions to create 'listen again' content for use 'on air' or automatic upload to common platforms.

Key Features

- Multi-station audio, stream & data logger/skimmer.
- Configurable log durations with multiple formats.
- Virtually instant access from any PC with the Playback Client installed.
- Log audio, now playing, hardware events, silences, EPG information and more.
- Instant review and extract content for re-use.
- Schedule content to be extracted and uploaded to popular platforms.

www.myriad.radio

Broadcast.Radio Archive

Cloud Based Stream Logging/Skimming

B.R Archive allows you to maintain a rolling archive of your station's stream, with near instant access to your output for review, download and re-use.

Access any point in your archive up to just 5 seconds behind 'realtime', from anywhere in the world, on virtually any device, all from a web browser!

Key Features

- Cloud based stream audio & metadata logging.
- Configurable archive period.
- Near instant access for review and download via a web browser.
- Review content by Date/Time, Show Name or individual items.
- Download for reuse on air or 'listen again'.
- Audio available just five seconds after 'on air' broadcast time.

www.myriad.radio

SmartSign

Multi-Screen Studio Signage Solution

Key Features

- Multi-screen studio signage solution.
- Custom design editor to allow you to design your own SmartSign.
- Analogue & digital clocks, date formats and countdowns.
- Includes weather, Youtube, web cam feeds, RSS feeds and more.
- Smart tiles for status indicators (like Mic Live).
- Expand with more screens, each with their own unique layout.

SmartSign is an advanced, multi-screen studio signage solution designed to allow you to operate studio signage and information screens throughout your radio station from a standard Windows PC. Design each screen with a variety of 'tiles' arranged to convey key information in your studios, newsroom, reception, engineering & anywhere you need.
