## ACA ANTITRUST POLICY

Section 1 of the *Sherman Antitrust Act* and Section 5 of the *Federal Trade Commission Act* prohibit contracts, combinations or conspiracies in restraint of trade and unfair methods of competition in commerce...

The original membership of this Association, conscious of the Antitrust problems inherent in trade association activities, provided in the Association By-laws that the new organization shall not directly or indirectly restrict free and lawful competition. To ensure continued strict compliance with the antitrust laws, this restatement of ACA Antitrust Policy has been prepared for the membership. These clearly-defined statements of conduct must always be kept in mind at all Association meetings and other activities must be conducted in accordance therewith.

One of the most clear antitrust violations an association can commit is an agreement by its members to set prices a fixed level. Such an agreement is a per se violation of the antitrust laws, even if the prices set are reasonable or the ends sought are worthy. Similarly, terms and conditions of sale which effect the buyer should not be discussed. These include discounts, freight allowances, terms of product warranties and other individual policies followed in dealing with customers. Informal understanding and planned courses of action on these subjects by competitors also clearly are forbidden.

Administrative or disciplinary action against member companies, or the expulsion member companies, may result in economic injury to the affected members and, thus may constitute an illegal boycott or restraint of trade. Therefore, these sensitive areas must be discussed in accordance with strictly-defined legal guidelines and only in the presence of counsel.

Frequently, an association engages in the voluntary development of a product specification or industry standard of quality. Antitrust problems will arise if the standard developed advances the economic interest or operates as a marketing advantage for some members to the detriment of other.

Statistical reporting is another common association-sponsored activity. However, since some associations and their members have used these activities in the past to further price-fixing and monopolistic schemes, statistical reporting projects must be conducted with clearly-defined rules regarding the collection and dispersal of confidential product information. Antitrust problems also may arise when associations become involved in industry-wide research and development programs. When pooling of results exists, association-sponsored joint research and development activities may injure competition by diluting and competitive pressure to innovate.

Another area of potential antitrust infraction involves association-sponsored efforts to petition government agencies for action which may have an adverse economic impact on some competing companies. A delicate balance always must be maintained between the First Amendment right to petition government and the antitrust laws' prohibition against restraint of trade. The First Amendment right to petition government and the antitrust laws' prohibition against restraint of trade. The First Amendment does not protect parties which see to prod government agencies into imposing trade restrictions by misleading them or by engaging in other dishonest activities. Any effort designed to injure industry competitors clearly is prohibited.

The proper conduct of association meetings requires an understanding and conscious awareness by all of anti-trust implications. Your non-participation in the discussion pro and con may not protect you if, out of such discussions at a meeting you attend, any agreement in restraint of trade originates. However, no imputed unlawful purpose can arise if conscious independent and individual judgment is exercised and no illegal common course of action is pursued.

To assist in avoiding antitrust problems at Association meeting, a list of four DON'TS has been prepared. You should read and remember the four basic rules:

### **ASSOCIATION ANTITRUST DON'TS**

1. DON'T discuss the prices your company will charge customers.
2. DON'T discuss discounts, terms or conditions of sale, warranty terms, profits or profit sharing margins, shares of the market, bids or the intent to bid, rejection or termination of customers sales territories or markets.
3. DON'T discuss administrative or disciplinary action by the Association against a particular member, or enforcement of the Association's Code of Ethics, in the absence of specific legal guidance.
4. DON'T propose or discuss any proposal, in the absence of specific legal guidance, that the Association sponsor or engage in any activity which may have the effect of producing an adverse economic impact on some competing companies.

**BE ALERT AND KEEP INFORMED.** Antitrust laws are wide-ranging, complex, and subject to changing interpretations. Consult your company's lawyer or an Association Counsel immediately if you have any questions about the legality of any proposed Association action.
