

# Safe, efficient and innovative mine-site support

MPC Solutions is a WA-owned and operated mining services provider specialising in practical, reliable and safety-focused solutions for the mining and mineral processing sectors.

Founded by professionals with extensive on-site experience, MPC Solutions understand the challenges of maintaining clean, efficient and hazard-free processing environments. Its mission is to deliver smarter, safer and more productive services that directly support plant performance and reduce operational risk.

The company combines proven hands-on capability with modern, purpose-built equipment – including remote-controlled mini-loaders, remote Kanga loaders and Dugless-style loaders – to complete high-risk or labour-intensive tasks with improved safety outcomes and significantly greater efficiency.

By reducing the need for personnel to enter hazardous areas, MPC minimises exposure to confined spaces, dropped objects, dust and material flow hazards while achieving faster and more consistent cleanup results.

MPC Solutions works closely with major WA mining companies who rely on its fast mobilisation, strong safety culture and ability to deliver quality work with minimal impact on production. Whether supporting shutdowns, plant maintenance, tank refurbishment or daily cleanup duties, the team prides itself on delivering high-standard outcomes on every project.

## Mining and mineral processing plant cleanup

MPC Solutions specialise in efficient plant cleanup across crushers, mills, conveyors, thickeners, tanks and other critical production assets. Using remote-controlled loaders and Dugless-type units, its crews safely remove spillage, buildup and debris from areas that traditionally require high-risk manual entry. This equipment dramatically reduces exposure to hazardous zones while significantly increasing cleanup speed. In conjunction with its high-capacity vacuum truck fleet, MPC delivers comprehensive

cleanup solutions for both routine and shutdown conditions.

## CIL/CIP tank cleanouts and refurbishment support

MPC Solutions is a leading provider of CIL/CIP tank cleanouts and refurbishment preparation. Its remote-operated mini-loaders and specialised tank-cleaning systems allow the team to remove sediment, scale and tank-floor material with minimal personnel entry. This reduces confined space time, enhances safety and shortens turnaround windows. Paired with high-pressure cleaning tools and vacuum extraction, the team provides complete end-to-end tank cleaning services to support refurb works and improve plant reliability.

## Non-destructive digging and hydro excavation

MPC's modern vacuum truck fleet also supports NDD and hydro excavation services, providing safe, precise underground utility exposure and service locating. This method minimises risk of asset damage and is ideally suited for processing plants, maintenance teams and construction projects.

## Recruitment and labour hire

MPC Solutions provides experienced, site-ready personnel tailored to the needs of mining and processing operations. The team includes process technicians, machine operators, labourers, TA's, shutdown support crews and site-cleaning personnel. Led by industry-experienced recruiters and ex-operators, MPC ensures placements are capable, reliable and aligned with the safety expectations of each site. MPC prides itself on supplying the right people for the right roles, reducing downtime and improving operational continuity.

## The MPC Commitment

At MPC Solutions, safety, innovation and reliability underpin every job undertaken. By integrating advanced remote-controlled technology with skilled personnel and high-quality equipment, it delivers efficient, low-risk solutions that help clients operate safely and stay production-ready. With a growing fleet and a proven hands-on team, MPC Solutions continues to set the benchmark for mining services across WA.

## The trusted mining recruiters

MPC Solutions excels in providing skilled labour for mining projects across WA. With industry-leading expertise in sourcing and deploying workers for site-specific tasks – from specialised trades to general labour – every project is supported by competent and safety-conscious personnel.

**No matter your labour requirements, you can rely on MPC Solutions' team to connect you with the right fit for your needs.**

Partner with MPC Solutions to streamline your mining recruitment process and secure the skilled workers you need.
