

CAPABILITY STATEMENT

2026

COMPANY OVERVIEW

Groundforce Contracting was established in 2023 by husband-and-wife directors **Thomas and Lucy Mehic**. Based in **Central West NSW**, we are a proud family-owned business built on a foundation of reliability and superior execution.

With a background spanning earthmoving operations and the heavy plant mechanic trade, managing director Tom identified a critical gap in the market: the need for dependable, meticulously maintained plant backed by strong technical + mechanical expertise and support. Since expanding, we now proudly service multiple industry sectors, with focus on civil construction, energy and agricultural sectors.

We are committed to securing exceptional outcomes for our clients, by pairing clean, capable machinery with expert, on-the-ground mechanical support - we actively minimise downtime and maximise project momentum. This strict focus on reliability translates directly to cost efficiency, all while maintaining the highest productivity and safety standards.

Backed by extensive field knowledge, our cohesive, highly skilled team delivers comprehensive solutions tailored to any project budget, size, or complexity.

- ✓ CAT 305 - 5 Tonne Excavator
- ✓ ISUZU - 14 Tonne Rigid tipper
- ✓ INTERNATIONAL - 11 000L Water cart

Core Competencies

Project Support & Co-ordination

As an owner-operator contractor, we understand the critical importance of clear, timely, and proactive communication.

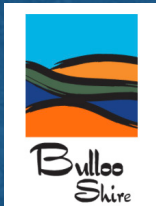

We work closely with general contractors, subcontractors, inspectors, and project managers to ensure seamless coordination & efficient project execution. This enables us to respond quickly to site needs, resolve issues before they impact schedules, and adapt to changing project requirements. By maintaining open lines of communication at every stage, we help ensure projects are delivered to the highest quality standards.

Safety, Quality & Compliance

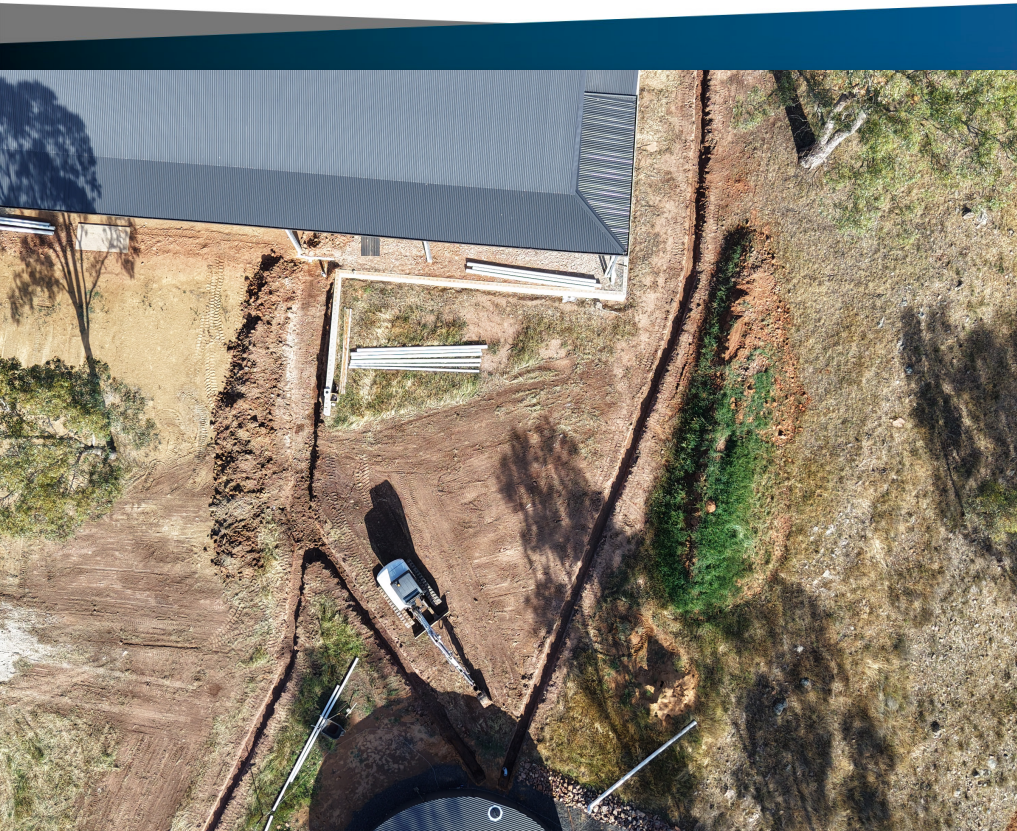

Delivering civil projects with a strong focus on quality, compliance, and environmental responsibility. Our small, dedicated team provides hands-on attention to every project, ensuring high- quality workmanship while fully adhering to all civil construction standards and regulations.

Groundforce Contracting also maintain strict compliance with environmental controls and site-specific requirements, consistently achieving safe, efficient, and reliable project outcomes across every project we undertake.

Some of Groundforce's trusted project partners :

KEY DIFFERENTIATORS

OWNER OPERATOR - SMALL FAMILY BUSINESS

As an owner-operator, family-run business, we bring an extensive level of accountability, care, and commitment that larger contractors often can't match.

Every project is personally overseen, ensuring high standards, clear communication, and reliable execution from start to finish. This hands-on approach allows us to build strong relationships, respond quickly on site, and consistently deliver quality outcomes our clients can trust.

RESPONSIVE COMMUNICATION & CLIENT FOCUSED APPROACH

Responsive communication and a client- focused approach are fundamental differentiators in our civil business. We maintain open, direct and prompt lines of communication with all clients to ensure rapid responses, clear expectations, and seamless coordination.

By understanding the unique demands of each project—schedules, safety requirements, and on-site conditions—we adapt quickly and provide solutions that keep work moving efficiently. This hands-on, client- first mindset reduces delays & mitigates risk.

PROACTIVE HIGH MAINTENANCE - RELIABILITY

With our vast industry hands on experience, we understand the need for highly maintained machinery. Not only does well maintain machines produce a high quality job, but also minimises downtime due to poor maintenance. In the event of subsequent unforeseen breakdowns, we have the hands on qualifications and experience to get the machines up and running in a extremely timely fashion, saving money + adhering to project time constraints .
