

VIGOR, OPTIMIZED.

WHAT IT DOES:

Nuvano MoCo is designed to help crops maintain vigor and recover from abiotic stress while supporting efficient nutrient uptake. The combination of molybdenum and cobalt works alongside our proprietary Optimizer Technologies to support plant metabolism, nutrient delivery and continued growth during challenging conditions.

WHEN TO USE:

During periods of abiotic stress, including heat, drought, frost, excess moisture or herbicide-induced stress.

OPTIMIZER TECHNOLOGIES:

For more info on each technology, visit nuvano.ag.

KEY GROWER BENEFITS:

- **Rapid Abiotic Stress Recovery:** Minimizes the yield-robbing effects of hail, frost, drought, and heat.
- **Herbicide Safener (Flash Stress):** Apply alongside post-emergent herbicides to prevent “yellow flash” and keep crops moving forward without missing a beat.
- **Highly Compatible:** Readily tank-mixes with most standard fungicides, insecticides, and herbicides.

RATE:

8-16 oz/acre in-furrow and foliar

3-0-3

GUARANTEED ANALYSIS

Total Nitrogen (N).....	3%
3% Urea Nitrogen	
Soluble Potash (K ₂ O).....	3%
Cobalt (Co).....	0.2%
Molybdenum (Mo)	0.3%
