

DELIVERY, OPTIMIZED.

WHAT IT DOES:

Help every spray application perform at its best. Whether you're applying biologicals, liquid fertilizer, foliar nutrients, herbicides, fungicides, or insecticides, optimizing delivery improves coverage, enhances uptake, and supports more consistent results across the acre.

WHEN TO USE:

Every liquid application of nutrients or crop protection products.

OPTIMIZER TECHNOLOGIES:

Nuvano Velo contains a proprietary blend of advanced ultra-chelation technologies that maximize the availability and uptake potential into the crop.

For more info on each technology, visit nuvano.ag.

RATE:

2 oz/acre

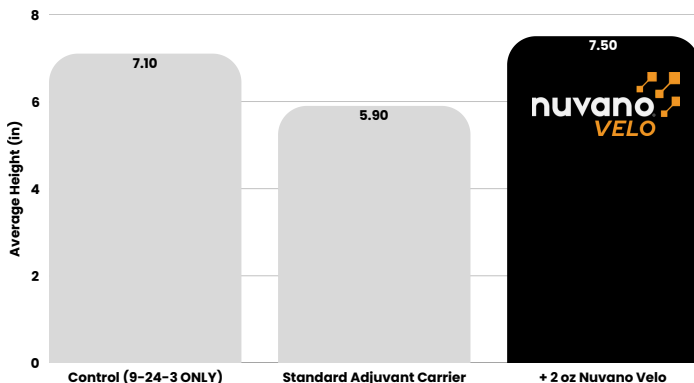

NUVANO PAIRINGS:

Corn Emergence Response Trial

Highest leaf-tip down to stem-base measurements.

9-inch in-row spacing, 40-foot plot length (20 ft over two rows), 54 plants per plot, 4 replicates per treatment.

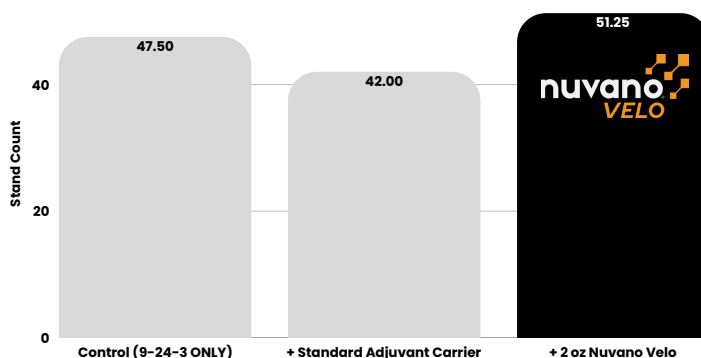

Corn Emergence Response Trial

Stand counts were taken in each plot once emergence was complete.

Counts represent the number of plants that emerged out of 54 seeded.

9-inch in-row spacing, 40-foot plot length (20 ft over two rows), 54 plants per plot, 4 replicates per treatment.

AGRICULTURE, OPTIMIZED.
