TRIPODS

Focus on the Big [clear] Picture...

A tripod not only provides stability, it also provides freedom.

A tripod keeps your camera's position secure, allowing you to focus your energy and attention on creating that perfect photograph. No longer will you fumble between settings or constantly adjust the camera while simultaneously directing your models or clients.

Whether you're shooting formal portraits, candid, nature, architecture or sports, a tripod will work as an assistant to help you create the image you imagine.

CREATIVE COMPOSITION

A tripod can provide immense flexibility when it comes to image composition. It allows for tilting, panning and adjusting for various height requirements, all while retaining the ever important benefit of stability. While a tripod is equally beneficial in fast-paced disciplines of sports, action and other areas, it can also allow you to slow down, consider your choices and think through your vision before taking your first shot.

INCREASED DEPTH OF FIELD

Keeping your optimum depth of field requires shooting with a fairly small aperture and at a lower ISO setting. Photographing at a lower shutter speed using a tripod eliminates shake and movement, allowing you to shoot at slower speeds while keeping the image razor sharp, foreground to background.

HEIGHTEN YOUR HDR RESULTS

Photographing High Dynamic Range (HDR) images requires consistency between shots taken at different exposures. A tripod will keep your images sharp and framed correctly so that, as you're shooting multiple images at changing exposure settings, the scene itself remains stable and in place.

MULTI-PURPOSE YOUR GEAR

A tripod can serve additional functions outside of its traditional role. It can be used with your camcorder as well as your DSLR. It can also double as a light stand, holding reflectors or flash units when you're shooting on location. Many photographers utilize a tripod to fulfill multiple roles on a single shoot.

Professional XC Series

Perfectly suited for on-the-go photographers

ProMaster XC series tripods are lightweight, stable, stylish, and easy to carry. They are the ideal choice for backpackers, nature and wildlife photographers, or photojournalists where the size of their gear matters. Featuring 5-section legs with 180° folding design for compact storage, the XC series tripods will delight mobile photographers.

XC325C (Carbon Fiber Legs)

- + Max Height: 63 in / 160 cm
- + Min Height: 7 1/16 in / 18 cm
- + Folded Length: 20 11/16 in / 52.5 cm
- + Max Load: 13 lb / 6 kg
- + Weight: 2 lb 12 oz / 1.24 kg

XC525C (Carbon Fiber Legs)

- + Max Height: 59 in / 150 cm
- + Min Height: 5 7/8 in / 15 cm
- + Folded Length: 15 3/4 in / 40 cm
- + Max Load: 13 lb / 6 kg
- + Weight: 2 lb 12 oz / 1.26 kg

XC328C (Carbon Fiber Legs)

- + Max Height: 63 in / 160 cm
- + Min Height: 7 7/8 in / 20 cm
- + Folded Length: 21 5/8 in / 55 cm
- + Max Load: 33 lb / 15 kg
- + Weight: 3 lb 10 oz / 1.65 kg

XC528C (Carbon Fiber Legs)

- + Max Height: 63 in / 160 cm
- + Min Height: 6 11/16 in / 17 cm
- + Folded Length: 16 5/16 in / 41.5 cm
- + Max Load: 33 lb / 15 kg
- + Weight: 3 lb 8 oz / 1.58 kg

A Easy and fast-to-use push button locks

B Multiple bubble levels in ball head

C Built-in monopod

D 180° folding legs for compact storage

XC522*

- + Max Height: 49 in / 124 cm
- + Min Height: 6 3/8 in / 16 cm
- + Folded Length: 11 7/8 in / 30 cm
- + Max Load: 11 lb / 5 kg
- + Weight: 1 lb 14 oz / 0.85 kg

XC525*

- + Max Height: 59 in / 150 cm
- + Min Height: 6 3/8 in / 16 cm
- + Folded Length: 15 1/2 in / 40 cm
- + Max Load: 22 lb / 10 kg
- + Weight: 2 lb 12 oz / 1.25 kg

XC528

- + Max Height: 63 3/8 in / 161 cm
- + Min Height: 6 3/8 in / 16 cm
- + Folded Length: 16 3/16 in / 41 cm
- + Max Load: 26 lb / 12 kg
- + Weight: 3 lb 7 oz / 1.56 kg

**Available in black, blue, green and red*

Why you need a ProMaster® Tripod...

If you had to choose just one accessory for your digital camera, a tripod should be your top pick. Professional photographers, advanced amateurs, weekend warriors and hobbyists alike will find their photography improves substantially when using a tripod. Today's models are light, portable and versatile, allowing you to shoot in situations you previously thought impossible.

Keep your images sharp by providing the stability of a tripod.

Any time you photograph handheld, vibration can affect the image clarity. A high quality tripod eliminates camera shake, thereby improving the sharpness of your images. Sharpness can also be improved with a tripod in low-light situations, where even the slightest movement can translate into substantial blur. Many situations require low-light shooting, either due to the environment or to create the proper mood. Combining the use of a tripod while increasing your ISO or adjusting other camera settings will help you capture the perfect shot.

Once you start using a ProMaster tripod, you'll wonder how you got along without it!

ProMaster® stands behind its products.

Our promise of satisfaction is unconditional; we want you to be 100% satisfied with ProMaster® products. If for any reason, your ProMaster® product fails within one year of the date of purchase, return the item to your ProMaster® dealer and it will be exchanged for you at no charge.
