

HITACHI

Multiply your options

Available in eight capacities (0.7-5 tons) and three sizes (small, medium, and large), there's an option for virtually every application.

Introducing **Multi air** - the new multi-position air handler

Fit more spaces with greater ease

Now it is faster, easier, and less expensive to solve application challenges.

The new Multi air AHU is the smart choice for energy-efficient cooling and heating in a multitude of settings. Available in capacities ranging from 0.7 to 5 tons, this unit provides a flexible solution for applications as diverse as single hotel rooms or entire houses.

Impressive performance is matched by exceptional convenience. Available in three sizes — small, medium, and large — with connections for either vertical or horizontal orientation, this unit is an ideal fit for virtually any space. An integrated DX Kit, together with pre-installed refrigerant components and single point of power, make placement and setup fast and easy, reducing installation time and cost.

Easy to install, economical to run, and built to last, the new Multi air AHU is a solution both contractors and building occupants will love.

Cooling & Heating

QUALITY YOU CAN COUNT ON

Simple installation

- Refrigerant components pre-installed
- Single point of power pre-installed for all sizes
- Electrical components and expansion valve are built in and ready to go
- Available with factory installed electric heating coils

Equipment built for long life

- Pre-painted steel on the top, coil, and blower doors and heavy-gauge embossed galvanized steel cabinet casing resist corrosion and rust creep.
- Insulated with one-inch R-4.5 insulation that delivers lasting performance and efficiency.

Smart design is quiet and energy-efficient

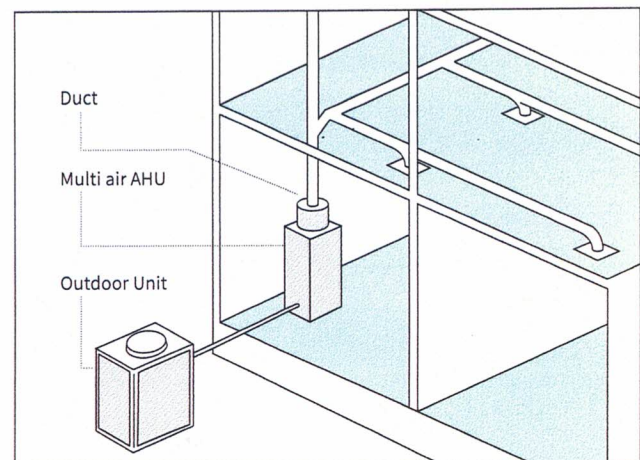

- Blowers are sized to circulate air both quietly and efficiently. The motor is four-tap constant torque motor (ECM).
- The rifled copper tube and aluminum fin coils produce high performance ratings and provide long-lasting quality by using the latest in heat transfer technology.

Available accessories:

- Electric heat kit
- Filter rack
- Downflow kit
- Condensate pump

For applications large or small

The new Multi air AHU comes in a range of capacities and sizes to suit applications as small as a hotel room or office, and as large as a single-family house.

[The air handling unit can be connected to ductwork that runs throughout the house.]

Three convenient sizes

- Small – 43 x 17-1/2 x 21 inches
- Medium – 48 x 21 x 21 inches
- Large – 58-3/4 x 24-1/2 x 21-3/4 inches

Eight capacities

- From 0.7 to 5 tons, there's a capacity to fit every need
- Comes with two fan speeds (high and standard)
- Comes with two external static pressure settings (high and standard)
