

Beef Pasturefed 16 Supplement Pellet

Product Description

Woods Stockfeeds Beef Pasturefed 16 Supplement Pellet is a stockfeed supplement suitable to be fed to recently weaned cattle over 200kg liveweight and up to 600kg liveweight as a supplement in conjunction with pasture or non-cereal grain silage and hay.

This pellet is composed of pulse seeds (such as faba beans, chickpeas, mungbeans, lupins, peas, etc) protein meals (such as canola meal, soybean meal, cottonseed meal, etc), fibre sources (such as soy hulls, pulse hulls, peanut shell, etc.), molasses, vegetable oil, macro minerals, trace minerals and vitamins.

It does not contain cereal grains, cereal grain by-products or any rumen modifier. It may or may not contain urea.

Feeding Guidelines

Cattle should be introduced gradually to any change in their diet to allow the rumen microflora to adapt. Cattle should have access to adequate pasture or hay in this introduction phase of 7 to 10 days. The level of feeding after this period can be determined by the amount of available pasture and/or hay on offer.

Typical Result* – Dry Matter Basis

ANALYTICAL DATA	RESULT
Crude Protein	16%
Moisture	11%
Crude Fibre	24%
NDF	32.89%
Fat	3%
ME	11MJ/kg
Calcium	0.61%
Phosphorus	0.31%
Potassium	0.98%
Sulphur	0.18%
Magnesium	0.25%
Copper	8mg/kg
Vitamin A Added	4550IU/kg
Vitamin E Added	8.86mg/kg
