

## Beef Grower/Breeder 10U Lick

### Product Description

Woods Stockfeeds Beef Grower/Breeder 10U Lick is a dry loose lick suitable for cattle grazing standing mature pasture or crop stubble of at least 1000kg DM/Ha.

**Beef Grower/Breeder 10U Lick** contains no grains or grain components and is suitable to be considered a grain free/pasturefed diet. No rumen modifiers are used in the production of this feed.

**Beef Grower/Breeder 10U Lick** is composed of slow rumen degradable protein meals, urea (10% maximum), salt (15% maximum), limestone, mono-dicalcium phosphate (MDCP), magnesium and sulphur sources, or other trace minerals and vitamins. Additives such as rumen modifiers or probiotics may be included at the request of the customer.

### Feeding Guidelines

**Recommended feeding rate** is 250 to 300 grams per head per day.

Always start cattle on dry loose lick at a low level of urea, such as **Woods Stockfeeds Beef Starter 5U Lick**, then move them up to the desired dry loose lick such as **Beef Grower/Breeder 10U Lick**.

Supply in well drained open-ended troughs or covered feeders. Once consumption rates are settled, do not let troughs become empty as cattle may over consume upon reintroduction of dry loose lick.

**Beef Grower/Breeder 10U Lick** is also available with 15% and 20% urea.

### Typical Result\* - Dry Matter Basis

NUTRIENTS	TYPICAL ANALYSIS
Total Crude Protein	61.27%
Total Equiv Protein	40.90%
Calcium	4.46%
Sulphur	2.41%
Copper	143 mg/kg
Total Phosphorous (P)	2.11%
Vitamin A	26498 IU/kg
Vitamin E	39.7 mg/kg
Selenium	3.3 mg/kg
Zinc	421 mg/kg

### WARNINGS:

- Products that contain urea may be poisonous to stock
- Do not feed to starving stocks as they may overconsume the lick
- Do not feed if forage available is less than 1000kg DM/Ha
- Do not allow the product to become wet and accessible to stock
- Feed away from animals' water supply
- Do not feed to dogs, horses or other equines as may prove fatal
- Ensure animals are not excessively craving salt before supply
- Do not feed dry loose licks in conjunction with other supplements that contain urea as this may cause urea toxicity
- Always monitor consumption of dry loose licks
- Woods Stockfeeds has no control over the feeding of this product and accepts no responsibility for any stock losses that may occur
- Salt levels may vary depending on stock water or soil salt content

If rumen modifier is required, it can be requested through your supplier or Woods Stockfeeds.

DISCLAIMER: There may be variations of composition depending on seasonal conditions and availability of raw materials. The specifications are given as a general indication only on a typical analysis. Shelf life of this product is limited. It is recommended that the product be stored in a cool dry place and be consumed within a six month period from date of manufacture.
