

Beef Pasturefed Hi Phos Lick

Product Description

Woods Stockfeeds Beef Pasturefed Hi Phos Lick is a dry loose lick suitable for cattle grazing green and/or standing mature pasture as well as crop stubble of at least 1000kg DM/Ha. It is formulated with a higher level of phosphorous for growing and breeder cattle in phosphorous deficient country.

Beef Pasturefed Hi Phos Lick contains no grains or grain components and is suitable to be considered a grain free/pasturefed diet. No rumen modifiers are used in the production of this feed.

Beef Pasturefed Hi Phos Lick is composed of slow rumen degradable protein meals, salt (6.5% maximum), limestone, monocalcium phosphate (MDCP), magnesium and sulphur sources, and trace minerals and vitamins.

Feeding Guidelines

Recommended feeding rate is 150 to 250 grams per head per day for growing stock and 200 to 300 grams per head per day for adult stock.

Supply in well drained open-ended troughs or covered feeders. Once consumption rates are settled, do not let troughs become empty as cattle may over consume upon reintroduction of dry loose lick.

Typical Result* - Dry Matter Basis

| NUTRIENTS | TYPICAL ANALYSIS |
|-----------------------|------------------|
| Total Crude Protein | 13.75% |
| Calcium | 12.02% |
| Sulphur | 2.12% |
| Copper | 112 mg/kg |
| Total Phosphorous (P) | 10% |
| Vitamin A | 20872 IU/kg |
| Vitamin E | 31.3 mg/kg |
| Selenium | 2.5 mg/kg |

WARNINGS:

- Do not feed to starving stocks as they may overconsume the lick
- Do not feed if forage available is less than 1000kg DM/Ha
- Do not allow the product to become wet and accessible to stock
- Feed away from animals' water supply
- Do not feed to dogs, horses or other equines as may prove fatal
- Ensure animals are not excessively craving salt before supply
- Always monitor consumption of dry loose licks
- Woods Stockfeeds has no control over the feeding of this product and accepts no responsibility for any stock losses that may occur
- Salt levels may vary depending on stock water or soil salt content

If rumen modifier is required, it can be requested through your supplier or Woods Stockfeeds.

DISCLAIMER: There may be variations of composition depending on seasonal conditions and availability of raw materials. The specifications are given as a general indication only on a typical analysis. Shelf life of this product is limited. It is recommended that the product be stored in a cool dry place and be consumed within a six month period from date of manufacture.
