

Beef Pasturefed Dry Season 10U+P Lick

Product Description

Woods Stockfeeds Beef Pasturefed Dry Season 10U+P Lick is a dry loose lick suitable for growing and older aged cattle grazing maturing and dry standing pasture feed of at least 1000kg DM/Ha. It has high level of urea to help restrict supplement intake and keep cattle grazing mature dry pasture. This dry loose lick contains adequate level of phosphorous for growing cattle throughout the dry season.

Beef Pasturefed Dry Season 10U+P Lick contains no grains or grain components and is suitable to be considered a grain free/pasturefed diet. No rumen modifiers are used in the production of this feed.

Beef Pasturefed Dry Season 10U+P Lick is composed of slow rumen degradable protein meals, urea (10% maximum), salt (15% maximum), limestone, mono-dicalcium phosphate (MDCP), magnesium and sulphur sources, and trace minerals and vitamins.

Feeding Guidelines

Recommended feeding rate is 200 to 300 grams per head per day for growing stock and 250 to 400 grams per head per day for adult stock.

Always start cattle on a dry loose lick with a low level of urea such as **Woods Stockfeeds Beef Starter 5U Lick** or **Woods Stockfeeds Beef Pasturefed Weaner Lick**.

Supply in well drained open-ended troughs or covered feeders. Once consumption rates are settled, do not let troughs become empty as cattle may over consume upon reintroduction of dry loose lick.

This product is also available with 7%, 15% and 20% urea, please see other product brochures for more information.

Typical Result* - Dry Matter Basis

NUTRIENTS	TYPICAL ANALYSIS
Total Crude Protein	52.54%
Total Equiv Protein	33.81%
Crude Fibre	5.60%
Fat	2.38%
Calcium	6.06%
Total Phosphorous (P)	4.03%
Sodium	6.26%
Sulphur	1.2%
Vitamin A	21112 IU/kg
Vitamin E	31.6 mg/kg
Zinc	346.9 mg/kg

WARNINGS:

- Products that contain urea may be poisonous to stock
- Do not feed to starving stocks as they may overconsume the lick
- Do not feed if forage available is less than 1000kg DM/Ha
- Do not allow the product to become wet and accessible to stock
- Feed away from animals' water supply
- Do not feed to dogs, horses or other equines as may prove fatal
- Ensure animals are not excessively craving salt before supply
- Do not feed dry loose licks in conjunction with other supplements that contain urea as this may cause urea toxicity
- Always monitor consumption of dry loose licks
- Woods Stockfeeds has no control over the feeding of this product and accepts no responsibility for any stock losses that may occur
- Salt levels may vary depending on stock water or soil salt content

If rumen modifier is required, it can be requested through your supplier or Woods Stockfeeds.

DISCLAIMER: There may be variations of composition depending on seasonal conditions and availability of raw materials. The specifications are given as a general indication only on a typical analysis. Shelf life of this product is limited. It is recommended that the product be stored in a cool dry place and be consumed within a six month period from date of manufacture.
