

Beef Pasturefed Forest Breeder 15U Lick

Product Description

Woods Stockfeeds Beef Pasturefed Forest Breeder 15U Lick is a dry loose lick suitable for growing and older cattle grazing maturing to dry standing pasture feed of at least 1000kg DM/Ha. It is formulated with a moderate level of phosphorous to help improve conception rates of cows and heifers in phosphorous deficient country.

Beef Pasturefed Forest Breeder 15U Lick is composed of slow rumen degradable protein meals, urea (15% maximum), salt (20% maximum), limestone, mono-dicalcium phosphate (MDCP), magnesium and sulphur sources, and trace minerals and vitamins.

Feeding Guidelines

Recommended feeding rate is 150 to 250 grams per head per day for growing stock and 200 to 300 grams per head per day for adult stock.

It is recommended to start cattle on a dry loose lick with a low level of urea such as **Woods Stockfeeds Beef Starter 5U Lick**.

Supply in well drained open-ended troughs or covered feeders. Once consumption rates are settled, do not let troughs become empty as cattle may over consume upon reintroduction of dry loose lick.

Typical Result* - Dry Matter Basis

NUTRIENTS	TYPICAL ANALYSIS
Total Crude Protein	65.54%
Total Equiv Protein	51.76%
Calcium	5.1%
Sulphur	3.03%
Total Phosphorous (P)	4.01%
Vitamin A	25006 IU/kg
Vitamin E	50 mg/kg

WARNINGS:

- Products that contain urea may be poisonous to stock
- Do not feed to starving stocks as they may overconsume the lick
- Do not feed if forage available is less than 1000kg DM/Ha
- Do not allow the product to become wet and accessible to stock
- Feed away from animals' water supply
- Do not feed to dogs, horses or other equines as may prove fatal
- Ensure animals are not excessively craving salt before supply
- Do not feed dry loose licks in conjunction with other supplements that contain urea as this may cause urea toxicity
- Always monitor consumption of dry loose licks
- Woods Stockfeeds has no control over the feeding of this product and accepts no responsibility for any stock losses that may occur
- Salt levels may vary depending on stock water or soil salt content

If rumen modifier is required, it can be requested through your supplier or Woods Stockfeeds.

DISCLAIMER: There may be variations of composition depending on seasonal conditions and availability of raw materials. The specifications are given as a general indication only on a typical analysis. Shelf life of this product is limited. It is recommended that the product be stored in a cool dry place and be consumed within a six month period from date of manufacture.
