

Product Description

Woods Stockfeeds Horse Hi Cal Lick is a high-calcium dry loose lick suitable for feeding horses which are grazing tropical pastures with high oxalate levels, resulting in “Big Head” syndrome. “Big Head” disease occurs in horses and ponies because of dietary mineral imbalances. Forages with high levels of oxalates ‘tie-up’ calcium, causing it to be unavailable for absorption and upsetting the calcium and phosphorous ratio in circulation. Horses draw calcium from their bones when there is insufficient supply from the diet, then fibrous growths are formed to compensate for the bone loss thus the name “Big Head” disease.

The high calcium to phosphorous ratio in **Horse Hi Cal Lick** allows the horse and ponies to meet their calcium, phosphorous and other mineral requirements while grazing tropical pastures. **Horse Hi Cal Lick** is composed of slow rumen degradable protein meals, salt (8% maximum), limestone, mono-dicalcium phosphate (MDCP), magnesium and sulphur sources, and trace minerals and vitamins.

Feeding Guidelines

Horse Hi Cal Lick is formulated for horses and ponies consuming adequate levels of pasture and/or hay to meet their energy and protein needs.

Recommended feeding rate is 200 to 300 grams per head per day, depending on the age and activity of the horses.

Supply in well drained open-ended troughs or covered feeders and ensure that animals have access to a reliable supply of clean, fresh water.

Typical Result* - As Fed Basis

NUTRIENTS	TYPICAL ANALYSIS
Total Crude Protein	4.33%
Fibre	2.77%
Fat	5.68%
Calcium	19%
Phosphorus (P)	6%
Digestible Energy	4.35 MJ/kg
Sulphur	2%
Magnesium	1.6%
Sodium	3.17%
Vitamin A Added	24000 IU/kg
Vitamin E Added	180 mg/kg
Chloride	4.87%

WARNINGS:

- Do not feed to starving stocks as they may overconsume the lick
- Feed away from animals' water supply
- Ensure animals are not excessively craving salt
- Always monitor consumption of dry loose lick
- Woods Stockfeeds has no control over the feeding of this product and accepts no responsibility for any stock losses that may occur

DISCLAIMER: There may be variations of composition depending on seasonal conditions and availability of raw materials. The specifications are given as a general indication only on a typical analysis. Shelf life of this product is limited. It is recommended that the product be stored in a cool dry place and be consumed within a six month period from date of manufacture.
