

LeafSolution

GUTTER GUARD

The exclusive design and engineering of Leaf Solution maximizes both gutter and roof protection. Our patented Triple-Dip Capillary Diversion System captures all rainwater—even during torrential downpours—and channels it directly into the gutter. The stainless-steel mesh is integrated vertically and horizontally into a durable substrate, then assembled using a patented hemming process that prevents separation, sagging, and stretching.

FASCIA MOUNT

- Available in Mill, Black and White ●●○
- Available in 5" and 6" widths

Material

- Surgical stainless-steel mesh
- 42 mesh (440 micron openings)
- Polyester-painted strong .024" aluminum body
- Mesh is bonded horizontally and vertically to the substrate and secured with a patented hemming process to prevent separation, sagging, or stretching.
- Mechanically crimped to ensure mesh/substrate capture into the body

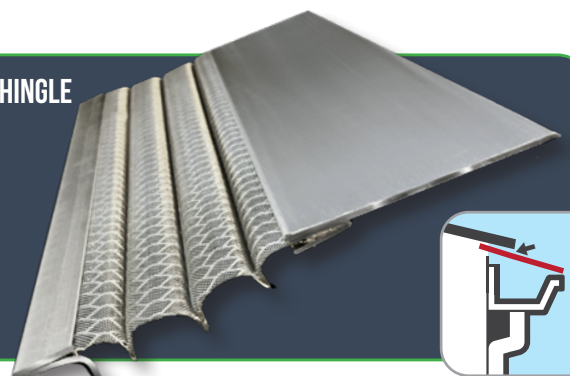

Opening Design:

- 42-mesh micro-mesh blocks fine debris
- 57% open area for high water flow
- Triple-dip design guides water into the gutter
- Handles up to 60 GPM

Profile & Dimensions:

- Available in 5" and 6"
- Installed at a 7-15° angle for self-shedding
- Reinforced back bend for added strength
- Low-profile design for a clean roofline

UNDER SHINGLE

- Available in Mill, Black, White, Brown, Almond and Bronze. ●●○●●●
- Available in 5" and 6" widths

Installation Options:

- Under-shingle application
- Fascia-mount installation secures to both the fascia and gutter lip, creating significantly improved system strength

Compatibility:

- Works with all Leaf Solution miters & end caps
- Fits standard K-style gutters

Custom-engineered 440-micron stainless steel mesh is optimally sized to maximize water flow while still blocking shingle grit.

The triple-dip, arc-shaped surfaces deflect and force all water into the gutter below.

Your Choice of 6 COLORS with Matching Inside Miters and End Caps!
