# ABOUT US:

Aqua-Blue Pools has been constructing the highest quality pools in the Upstate for over 40 years.

Established in 1977 by Jerry Smith, we began setting standards for all others by working closely with both distributors and manufactures to create pool systems that lead to the best services, lower operating maintenance costs, and most importantly, thousands of satisfied customers.

We have continued to be an industry leader by raising the bar on construction techniques and custom pool designs. We expanded our design services with the addition of a full-time CAD Designer, Civil Engineer and 3D pool studio capabilities, and are fully equipped for the future of assisting our customers in creating their own backyard oasis.

# GUNITE:

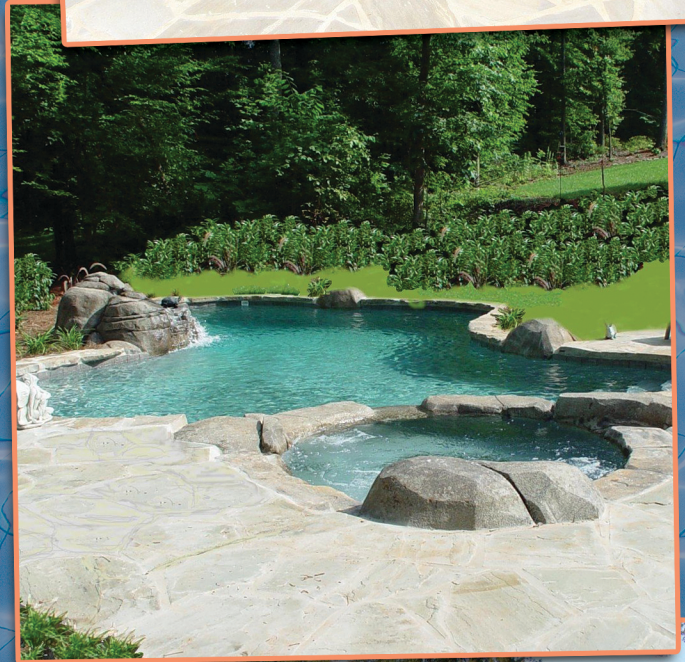

**Gunite Pools** are among the top choices for many homeowners today due to their beauty, versatility and durability. These pools are not only highly durable, but they can also be fashioned into just about any shape that you desire. Gunite pools use rebar framework sprayed over with a concrete and sand mixture, which is preferable over a traditional poured concrete pool that requires a wooden framework to hold the shape of basins. Gunite Pools made of this substance are hardwearing and built to last, and its adaptability gives us the ability to create an unlimited array of shapes.

## Pros:

- Built by hand using rebar and concrete and fully customizable when it comes to shape and size.
- Options include a multitude of shapes and designs, interior finishes, tile, coping decking, spas, water features, heating and automation.

## Cons:

- Considered the nicest pools you can build with the most options, they are, however, the most costly to build.
- Gunite pools will require premium costs to replace the interior finish periodically in comparison to a vinyl lined pool.

# FIBERGLASS:

**Fiberglass Pools** come in most any size and shape imaginable. These molded pools are installed in your yard in just one piece.

Fiberglass are strong, lightweight materials that are constructed by weaving small glass threads into fabric and hardening the fabric with a special polyester resin, with adding a weather-resistant gel for a smooth finish.

Because they are so smooth, these are more resistant to algae formation and maintain more stable pH levels. Fiberglass pools can usually be installed very quickly – sometimes as fast as a few days! The time frame varies depending on how long it will take for the excavation of the pool site and electrical work.

## Pros:

- Shell maintenance is limited compared to gunite and vinyl.
- Can customize the shell color, coping, decking, heating, water features, lighting, and automation.

## Cons:

- Typically, a limited number of shapes and designs available, so, not customizable other than adding a feature.
- Cost to build is close to gunite, as we use the top producer of fiberglass shells in the industry with the longest history.

# VINYL LINER CONCRETE:

## *“Our Specialty!”*

**Concrete Wall Vinyl Pools** Construction is a bit more complex than our other pool types. The overall process is the same, but there is a bit more work involved. Once site excavation is complete, builders set up forms to create the shape of the pool. Then, they install steel reinforcement and plumbing before pouring the concrete. Lastly, it's time to fill up the pool and enjoy! You will never have to repaint or re-plaster a vinyl pool. Because of the flexibility of vinyl coupled with the durability of the steel reinforced walls, these pools offer unlimited design options, sizes and shapes for your backyard!

### **Pros:**

- Load-bearing 10” concrete walls and solid steps allow for many of the benefits of a gunite pool with a much more affordable construction cost.
- Concrete wall pools will not rust or corrode, like a metal panel pool, and have a solid step, instead of a plastic one.
- Affordable interior liner replacement costs over time in comparison to a gunite pool
- A multitude of customizable shapes and designs.
- Concrete wall pools allow for a multitude of coping choices due to having a concrete wall base.
- Can add tanning ledges, swim outs, spill over spas, water features, lighting, heating and automation.

### **Cons:**

- *We really can't think of any! This is our most popular pool and is our specialty!*

# CONSTRUCTION:

Once the planning and designing steps of your backyard oasis is completed, the team at Aqua Blue Pools will begin construction.

From prepping the area to the entire installation, we will be in full communication of the step by step process and what stage we are in as we check it off our list. The parts required to put a pool in place can seem numerous and overwhelming, but rest assured you have a dedicated construction team that knows exactly what to do!

Before you know it, we'll be walking you through Pool School, our online course and guide that will help you learn what you need to know about keeping your new pool long-lasting and in top shape!

# PLANNING & DESIGN

At **Aqua-Blue Pools**, we will walk you through each step of your custom swimming pool design, the landscape layout, and hardscape additions. We offer all of that in our services so you can have your dream swimming pool area! After you browse some of our swimming pool designs, call us to set up a consultation to find out exactly what we can do for you to create your backyard oasis.

## 1. **Schedule An Appointment**

- Call Aqua-Blue Pools and Spas at 864-268-7508 to schedule an appointment with one of our design specialists.

## 2. **Let's Go Pool Shopping!**

- Review all pool types, shapes, sizes, equipment, features, and finishes to find what you're looking for.

## 3. **What's it Going to Look Like?**

- Thanks to our 3D Design software, our specialists will virtually design your backyard oasis right before your eyes!

## 4. **Signed, Sealed & We Will Deliver!**

- Ready to chat about pricing and logistics? Once we're on the same page, we will begin construction on your backyard oasis!

# SERVICE & MAINTENANCE

We have a year-round, full-time state of the art Service and Maintenance Department that can perform routine service calls, openings, closings, weekly, monthly and vacation pool services plus updating pool equipment as well as pool inspections. Our uniformed team members go through extensive annual training and accreditation through Pentair Pool Certification. We have a fleet of GPS monitored, and fully-stocked service vehicles ready to serve you!

American Made.  Amazing Flavor.

# HOT TUB & SPA SHOWROOM

**bullfrog**<sup>®</sup>  
spas

Experience a revolutionary approach to hot tub therapy with a **Bullfrog Spa** from **Aqua Blue Pools**. What sets **Bullfrog** apart is their exclusive *JetPak Therapy System*<sup>®</sup>, the only technology that lets you choose from up to 16 unique massage experiences.

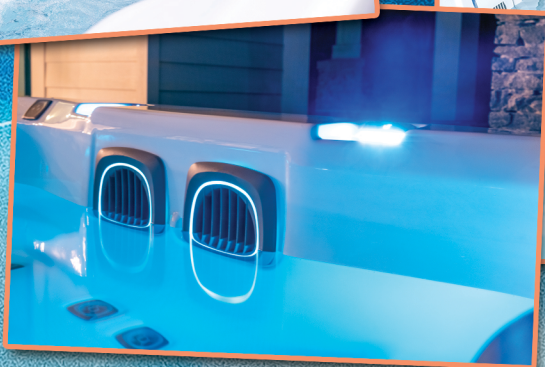

Whether you're looking for the therapeutic kneading of the *Oscillator* or a more soothing rhythm like that of the *Pulsator*, you can select your perfect combination and even re-arrange *JetPaks* anytime. This isn't just another hot tub; it's personalized hydrotherapy engineered just for you. **Bullfrog's** innovative plumbing powers every jet at full strength (something traditional hot tubs can't do) while cutting energy bills. Plus, their *Simplicity*<sup>®</sup> water care keeps your water crystal-clear with significantly less chlorine than salt systems, so you can focus on what really matters... **relaxation**.

Ready to experience the difference? Let us show you how **Bullfrog** can upgrade your daily wellness routine and help you unwind like never before.
