July 7, 2025

We love introducing clients to innovative products that make working easier and their office space look great. We’ve gathered some of our favorite furnishing ideas here that combine functionality with visual interest. If you are thinking of adding something special to your office, check out these sleek solutions to make everyone feel comfortable at work—even your pets!

EZO Bord Canvas Art Panels

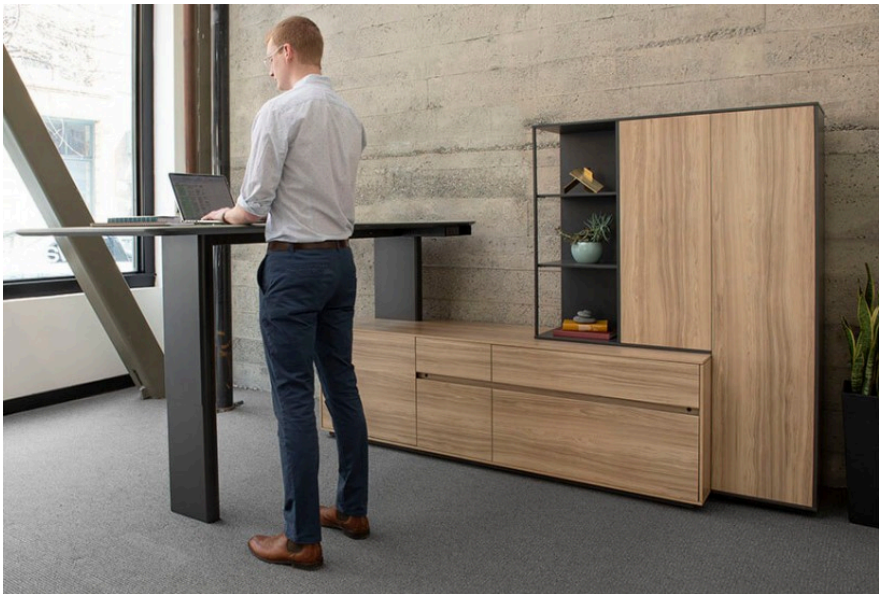

Sound absorption wall panels never looked so good. Beautiful [EZO Bord Canvas](#) designs are noise-reducing works of art that bring peace of mind—both visually and acoustically—to the office. Select panels from independent artists’ works, including Vlad Müller’s aerial photography and Oli Ullmann’s photographic expressions of nature. Or, create customized wall panels featuring your favorite artists’ work or incorporate your company logo. [EzoBord](#)

Darran Central Bark Pet Bed

When you bring your best friend to work, you want a comfortable place for them to hang out—not on a chair—in a bed. [Darran's Central Bark](#) pet bed collection integrates your furry friend's home away from home into office furniture design. Plush beds inside cabinet nooks or daybed pull-outs, along with sliding drawers that accommodate a water bowl and kibble, keep your pets comfortable all day. [DARRAN Furniture](#)

Watson Tia Office Workstation

If you want a stylish way to go from sitting to standing, we love the clean look of [Watson's Tia Office](#). Premium desk finishes and concealed lifting column support your body position throughout the day. Sleek surface finishes and storage options enhance both the beauty and functionality of your workday. Watson Allé Monitor Wall

Are we all seeing the same thing? You can with [Watson's Allé Monitor Wall](#). The freestanding, mobile wall mount makes quick work of moving flat screen monitors around the office. Simply unplug, roll up the cord, and wheel the monitor where you need it—break room, conference room, or lobby. Allé brings virtual team meetings, presentations, or entertainment where you can watch as a team. [Watson](#)

Open Range Artmakers
