

Biotree™
by PASSAGES®

Separates easily to load
cremated remains and
closes securely.

Memorial tree provided.

A sophisticated, contemporary
solution to "become a tree".

Made of bamboo fibers and other
biodegradable materials.

Unique shape provides superior
water retention.

Stays intact for several weeks after
planting a tree and adding water.

Neutralizes the pH of cremains
to allow a tree to grow.

Includes a unique geotag, allowing
families to mark their tree online
and post memorial comments.

HOW IT WORKS

Add cremains to the base of the Biotree Urn.

Families decide if they want to plant a sapling using the provided tree certificate, or work with their local nursery to grow a tree from a seed.

Just add water. No need to add soil, and the Biotree will treat the cremains.

Watch the loved one become a tree. Families may keep the urn inside until it begins to crack, telling them it is time to plant the urn.

The Biotree Urn and cremains are returned to nature as the tree grows.

Using the included tag, the location of the tree can be geotaged and families can create an online memorial to share with friends and family.

FAQS

What if my tree doesn't grow?

The Biotree urn has had a 100% germination rate, but as a precaution we guarantee our saplings for one year.

What if I want to keep the tree longer?

You can plant your Biotree in a pot and wait to plant your tree until you are ready.
