

Dear East Lake Woodlands Residents,

As part of our ongoing commitment to the safety of our community, the ELWCA is excited to announce a significant improvement to our controlled access system — the installation of the Envera System.

In recent years, we have witnessed the growing need for advanced measures to protect our homes and ensure the well-being of our residents. The Envera System represents a state-of-the-art solution that will not only bolster our infrastructure but also bring about several enhancements to our comfort in living here.

The Envera System offers cutting-edge technology that includes advanced vehicle video identification, access control, and data analytics. This comprehensive system will provide us with better data collection capabilities, allowing us to monitor and respond to incidents within the community more effectively.

One of the key advantages of implementing the Envera System is the cost-effectiveness it brings to East Lake Woodlands. By investing in this modern system, we anticipate long-term savings. The efficiency of the Envera System allows us to streamline operations, reducing the need for additional personnel and resources.

We understand that access control is a high priority for our residents, and we believe that the installation of the Envera System is a significant step towards that goal. The system has been successfully implemented in various communities across the nation, and the positive feedback has been overwhelming.

In the coming weeks, you will notice the installation process taking place. We appreciate your cooperation and understanding as we work towards making these enhancements to our community.

Additional information regarding the distribution of new resident RFID tags, to replace the current barcode system, will be forthcoming.

Please visit our website at www.eastlakewoodlands.com for the most up-to-date information related to timing, frequently asked questions, applications for RFID tags, and in-person Town Hall Information sessions.

Thank you for your cooperation, we can continue to make our neighborhood a safe and secure place to call home.

Sincerely,

ELWCA Board of Directors
