

BURSTING WITH PACKED WITH POSSIBILITY.

Brighten up your shelves with Cubika—a modern wooden toy brand made in Ukraine where vibrant, imaginative play meets responsible craftsmanship. Crafted from 100% organic wood sourced from the Carpathian Mountains, Cubika toys are made using timber from sustainably managed forests. The remote location ensures low pollution, and with our factory nearby, we keep transportation minimal and our carbon footprint low.

Each toy is finished with German-made, organic water-based paints—completely safe for children and environmentally friendly. Unlike other brands that mix wood with cheaper materials, Cubika toys are solid wood through and through, built to last through years of learning and play.

Designed to support early development and spark creativity, Cubika products combine quality, safety, and style—perfect for discerning parents and kids who dream in color. Cubika is more than just beautiful toys—it's a thoughtful choice for retailers looking to offer meaningful, sustainable, and safe play experiences.
