Comment

Sissener Corporate Bond Fund NOK-R was up by 1.3% in July, bringing the year-to-date return to 5.1%.

Apart from positive price movements in the Viaplay bonds we hold, July was a quiet month, primarily driven by coupon payments alongside some modest price gains in selected bonds within the energy sector.

In mid-July, Viaplay announced the acquisition of Telenor’s 50% stake in Allente for SEK 1.1 billion, making Viaplay the sole owner of Allente, which has approximately 840,000 subscribers across the Nordics and an expected EBITDA, post-synergies, approaching SEK 1.5 billion. At the same time, the company also announced that, in exchange for an upfront payment to rights holders, it would be released from providing a EUR 646 million guarantee facility.

In our view, these developments significantly highlight the ongoing turnaround efforts at Viaplay – a view evidently shared by the market, as the bonds immediately repriced from 70 to 80. Viaplay contributed 0.2% to the fund’s return in July.

Another bond worth mentioning is Shelf Drilling, which contributed 0.27% to the performance. Shelf has long been one of the fund’s larger positions and, due to its high running yield (coupon/price), is frequently among the top contributors to returns. The bond repriced from 80 to 85 in July despite no material news. However, positive news was announced in August: the company is being acquired by Ades International. We will comment on this in more detail in the August monthly report.

The primary market in the Nordics is typically very quiet in July, and this year was no exception. Only six new issuances were observed during the month. Demand for bonds, which appears to be driven by capital inflows, remains persistently strong. This, combined with limited supply, likely contributed to a broad-based increase in bond prices.

The fund’s yield was approximately 7.9% (NOK) at the end of the month, with a credit spread just above 400 basis points.
